

Mohamed Mahmoud

ETL Developer / IT Analyst

mohamed.mahmoud@email.com | +20 10X XXX XXXX |  github.com/mohamed-mahmoud |  linkedin.com/in/mohamed-mahmoud | mohamedmahmoud.com

Summary

Highly skilled ETL Developer with 4 years of experience in Informatica Power Center (v9.1 & 10). Proficient in designing and developing ETL strategies, integrating various data sources (SQL Server tables, Flat Files) into data warehouses. Possesses strong working knowledge of SQL/PL/SQL on Microsoft SQL Server 2010 and Unix shell scripting for error debugging. Experienced in job scheduling with Autosys, and incident management and change requests using ServiceNow, Jira, and Agile Central. Basic knowledge of Intellimatch reconciliation tool.

Education

Walchand College of Engineering

BTech CSE

Jan 2010 - Jan 2014, Sangli, Maharashtra

- H.S.C, Willingdon College, Sangli, Maharashtra - Oct 2009
- S.S.C, Martin's English School, Sangli, Maharashtra - Aug 2007

Experience

ETL Developer & IT Analyst

Full-time - On-site

Tata Consultancy Services

Jan 2014 - Jan 2018, London, UK

- Implemented a strategic technical solution to support the governance and monitoring of break standards, including enhancements to audit capabilities, for Barclays UK.
- Remediated source system data feeds, consolidating data into standardized feeds for consumption by the ETL layer.
- Pre-processed and delivered data from Front and Back office systems, along with static data, to the reconciliation tool via the ETL layer.
- Responsible for analyzing, designing, and developing ETL strategies and processes, including writing ETL specifications.
- Gathered requirements and created functional and low-level design documents.
- Developed and debugged Informatica mappings to resolve bugs and identify causes of failures.
- Interacted with users to identify and resolve issues with data loaded through the application.
- Developed various mappings utilizing different transformations.

Skills

ETL Tools & Processes: Informatica Power Center (v9.1 & 10), ETL, Extract, Transform, Load, Intellimatch, Data Warehousing, Data Reconciliation

Databases: SQL, PL/SQL, Microsoft SQL Server 2010

Operating Systems & Scripting: Unix, Shell Scripting

Project & Workflow Management: Autosys, ServiceNow, Jira, Agile Central, Incident Management, Change Management
