Education

Nanded University

BCA Nanded, Maharashtra, India

Experience

ETL Developer

Full-time - On-Site

Sun Trust Bank, New York, USA

JAN 2018 - Present

- Liaised closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define technical requirements and create project documentation.
- Developed solutions using Informatica 9.1, Oracle 11g, and UNIX environments.
- Utilized Informatica PowerCenter for extraction, transformation, and loading (ETL) of data into the database.
- Created and configured Sessions in Informatica Workflow Manager for loading data into database tables from various heterogeneous database sources like Flat Files and Oracle.
- Performed unit testing and system integration testing of developed mappings.
- Provided production support for deployed code and offered solutions for production issues.
- Engaged in one-to-one interaction with the client throughout the project and in daily meetings.

ETL Developer

Full-time - On-Site

Marshall Multimedia, New York, USA

JUN 2016 - DEC 2017

- Developed mappings using different sources with Informatica transformations.
- Created and configured Sessions in Informatica Workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files and Oracle.
- Performed unit testing and system integration testing of developed mappings.
- Provided solutions to the business for production issues.

ETL Developer

Full-time - On-Site

Assurant, Inc., Miami, USA

NOV 2015 - MAY 2016

- Performed small enhancements to existing ETL processes.
- Monitored daily data loads and attended to Informatica job failures by analyzing root causes and resolving them using standard documented processes.
- Gained experience in writing efficient SQL statements for data manipulation and queries.
- Demonstrated strong problem analysis & resolution skills, adept at working in multi-platform environments.
- Scheduled Informatica jobs using the Informatica scheduler.
- Extensively utilized ETL methodology for developing and supporting data extraction, transformations, and loading processes within a corporate-wide ETL solution using Informatica.
- Involved in creating unit cases and uploading them into Quality Center for Unit Testing and User Acceptance Testing Readiness (UTR).
- Ensured that daily support tasks were completed in accordance with defined Service Level Agreements (SLA).

Certificates

Concepts in Data Warehousing, Business Intelligence, ETL

BI Tools - Informatica 9.x

Skills

Databases: Oracle 11g, SQL, PL/SQL

ETL Tools: Informatica 9.1, Informatica PowerCenter 9.1, ETL Methodology

Operating Systems: Windows, Unix

Domains: Investment Banking, Advertising, Insurance, Healthcare

Methodologies & Concepts: Data Warehousing, Business Intelligence, Unit Testing, System Integration Testing, Production Support, Problem Analysis & Resolution, Quality Center
