Education

Nanded University

BCA Nanded, Maharashtra, India

Experience

ETL Developer

Full-time

Sun Trust Bank

JAN 2018 - Present, New York, USA

- Liaised closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define technical requirements and create project documentation.
- Performed development using Informatica 9.1, Oracle 11g, and UNIX.
- Utilized Informatica PowerCenter for extraction, transformation, and loading (ETL) of data into the database.
- Created and configured Sessions in Informatica workflow Manager for loading data into database tables from various heterogeneous sources like Flat Files and Oracle.
- Conducted unit testing and system integration testing of developed mappings.
- Provided production support for the deployed code.
- Offered solutions to the business for production issues.
- Maintained one-to-one interaction with the client throughout the project and in daily meetings.

ETL Developer

Full-time

Marshall Multimedia

JUN 2016 - DEC 2017, New York, USA

- Developed mappings using different sources by utilizing Informatica transformations.
- Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files and Oracle.
- Conducted unit testing and system integration testing of developed mappings.
- Provided solutions to the business for production issues.

ETL Developer

Full-time

Assurant, Inc.

NOV 2015 - MAY 2016, Miami, USA

- Performed small enhancements.
- Monitored daily data loads.
- Addressed Informatica job failures by analyzing root causes and resolving them using standard documented processes.
- Gained experience in writing SQL statements.
- Demonstrated strong problem analysis & resolution skills and ability to work in multi-platform environments.
- Scheduled Informatica jobs using Informatica scheduler.
- Extensively used ETL methodology for developing and supporting data extraction, transformations, and loading processes in a corporate-wide ETL solution using Informatica.
- Involved in creating unit test cases and uploading them to Quality Center for Unit Testing and UTR.
- Ensured daily support tasks were done in accordance with defined SLAs.

Certificates

Concepts in Data Warehousing, Business Intelligence, ETL

BI Tools - Informatica 9.X

Skills

Databases: Oracle 11g

Programming: SQL, PL/SQL

ETL & BI Tools: Informatica 9.1, Informatica PowerCenter, Informatica 9.X, Cognos

Operating Systems: Windows, Unix

Concepts & Methodologies: ETL, Data Warehousing, Business Intelligence, Data Extraction, Transformations, Loading, System Integration Testing, Unit Testing, Production Support, Problem Analysis & Resolution, SLA Management, Informatica Scheduler

Domains: Investment Banking, Advertising, Insurance
