Education

Nanded University

BCA Nanded, Maharashtra, India

Experience

ETL Developer

Full-time

Sun Trust Bank NY

Jan 2018 – Present

- Liaised closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define technical requirements and create project documentation.
- Developed solutions using Informatica 9.1, Oracle 11g, and UNIX environments.
- Utilized Informatica PowerCenter for extraction, transformation, and loading (ETL) of data into the database.
- Created and configured Sessions in Informatica workflow Manager for loading data into database tables from various heterogeneous sources like Flat Files and Oracle.
- Performed unit testing and system integration testing of developed mappings.
- Provided production support for deployed code and solutions to business for production issues.
- Interacted directly with the client throughout the project lifecycle and in daily meetings.

ETL Developer

Full-time

Marshall Multimedia

Jun 2016 – Dec 2017

- Developed mappings using various sources and Informatica transformations for an enterprise data warehouse project.
- Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files and Oracle.
- Conducted unit testing and system integration testing of developed mappings.
- Provided solutions to the business for production issues.
- Contributed to creating an enterprise data warehouse for financial, management, and rejection reports, calculating compensation and incentive amounts monthly.

ETL Developer

Full-time

Assurant, USA (Client: Assurant healthcare/Insurance Miami USA)

Nov 2015 – May 2016

- Performed small enhancements and daily load monitoring for the ACT BI - State Datamart project.
- Addressed Informatica job failures by analyzing root causes and resolving them using standard documented processes.
- Wrote complex SQL statements to support ETL processes and data analysis.
- Demonstrated strong problem analysis and resolution skills in multi-platform environments.
- Scheduled Informatica jobs using the Informatica scheduler.
- Extensively applied ETL methodology for developing and supporting data extraction, transformations, and loading processes in a corporate-wide ETL solution using Informatica.
- Created unit test cases and uploaded them to Quality Center for Unit Testing and UTR.
- Ensured daily support tasks were completed in accordance with defined Service Level Agreements (SLAs).

Certificates

Concepts in Data Warehousing, Business Intelligence, ETL

BI Tools - Informatica 9X

Skills

Databases: Oracle 11g, SQL, PLSQL

ETL Tools: Informatica 9.1, Informatica PowerCenter

Operating Systems: Windows, Unix

Domains: Investment Banking, Advertising, Insurance, Healthcare, Financial Services
