Education

Walchand College of Engineering

BTech CSE

Sangli, Maharashtra

January 2010 - January 2014

Experience

IT Analyst

Full-time

Tata Consultancy Services

Date - Date

- Responsible for analyzing, designing and developing ETL strategies and processes, writing ETL specifications
- Requirement gathering
- Making functional documents and low level documents
- Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures
- User interaction to identify the issues with the data loaded through the application
- Developed mappings using different transformations

Projects

Barclays UK London/HEXAD

Tata Consultancy Services

- Objective: Implement a strategic technical solution for the Government, SQL Server, UNIX, Autosys, JST, Informatica including enhancements to audit capabilities.
- Consolidation of data into standardized feeds.
- Remediated data feeds consumed by ETL layer.
- Reconciliation tool designed to source data from an ETL layer.
- Data from Front and Back office systems delivered to ETL for pre-processing before reconciliation.

Certificates

H.S.C - Willingdon College, October 2009

S.S.C - Martin's English School, August 2007

Skills

ETL: Informatica Power Center - Mapping Designing - Data Integration

Database: MS SQL Server - SQL - PL/SQL

Operating Systems: Unix - Shell Scripting - Error Debugging

Tools: Autosys - Service Now - JIRA - Agile Central - Intellimatch
