Summary

Dedicated Information Assurance Professional well-versed in analyzing and mitigating risk and finding cost-effective solutions. Excels at boosting performance and productivity by establishing realistic goals and enforcing deadlines. Versatile IT professional with 37 years of Enterprise design and engineering methodology.

Education

Florence Darlington Technical School

Associate of Science: Electronic Engineering

1980, Alexandria, Egypt

Experience

Information Technology

Full-time

Vodafone Egypt

02/2011 - Current

- Hired to manage accreditation efforts for a major department modernization project involving 3 accreditation packages each leading to successful Authorization To Operate decisions.
- Responsibilities then increased to include all departmental accreditation efforts leading to another 3 successful ATOs. Now, working on 4 new accreditation including re-authorization for an existing project.
- Succeeded in writing and implementing vulnerability management for existing accredited systems.
- Success of the accreditation hinged on coordination with ONI Enterprise in critical design decisions and to help the program integrate smoothly into the Enterprise thru many meetings, analyzing the Enterprise business model to understand the best fit for the program.
- The different projects required careful management of specific STIG compliance and hardening for the different configurations and services required for the specific domain to be integrated. Analyzed complex computer systems to assess vulnerability and risk.
- Supervised 5 external computer consultants and vendors.
- Managed application patches, data backup, security changes and network configuration.

Systems Engineer

Full-time

CIB Bank

02/2006 - 02/2011

- Hired to initiate processing strategies in fulfilling department analyst requirements. Requirements were fulfilled thru identifying product problems and strengths and collected data on customer experience and review of Enterprise compliance to transition to new technology for supporting new processing needs thru proper processing power.
- The next challenge came as storage requirements for better performance and more controlled uses. After careful study of local infrastructure design, a local storage with off the shelf solutions was adopted to grow local storage to over 200TB.
- In using this solution, the department saved just over a million dollars in purchasing and maintenance costs compared to the alternative.
- Next came requirements to improve processing of future big data formats fulfilled in a Red Hat Linux high compute cluster I designed, purchased and accredited for operation in the Enterprise.
- Improvement on big data analytical processing reduced time from 30 hours to 30 minutes as well as allow for more robust data thru higher selections of sensors, frequencies and range than allowed thru the traditional process.

Senior Systems Analyst

Full-time

Orange Egypt

02/1999 - 02/2006

- Hired to improve corporate and client communications and processing requirements which resulted in the design, build and deployment of 3 Enterprise network solutions. One solution resulted in expanding capabilities to supporting Washington Navy Yard, Norfolk Virginia and Hawaii support facilities.
- Fulfilled requirements for detecting crucial network software/hardware weaknesses and developing preventive strategies and solutions for avoiding interruptions and increasing system security thru documenting system layouts, wiring diagrams and addressing schema to understand layouts and make informed solutions to upper management.

Skills

Enterprise Platforms: Enterprise platforms - Domain Active Directory Layout - Data storage engineering - High Performance Computing

IT Skills: Project tracking - Hardware and software upgrade planning - Product requirements documentation - MS Visio - Data storage engineering - Desktop Publishing Software: Photoshop, Illustrator, HTML

Information Assurance: Risk Management Framework (RMF) - Active Directory design and deployment - Workstation build and deployment - Systems Accreditation Packages - Red Hat Enterprise Linux installation and hardening - Network Design & Troubleshooting

Technical Skills: Active Directory - Hardware Engineering - Information Technology - Red Hat Enterprise Linux Servers - MS Windows Servers - MS Windows Desktop - Network Design & Troubleshooting - Architectural Diagrams - Accreditation Boundarys - Risk Management - Enterprise Strategies - Vendor Relations

Soft Skills: Self-directed - Decisive - Collaborative - Team Work - Collaboration

Extracurricular Activities

Class President

Second year

Florence Darlington Technical School

- Dean's list for high GPA
