## Education

---

### Cairo University

B.Sc. in Computer Science

2014 - 2018, Giza, Egypt

## Experience

---

### Data Science Assurance Associate

Full-time - On-site

Ernst & Young LLP

May 2018 - May 2020, Cairo, Egypt

- **Technology Assisted Review (TAR):**
  - Core member in developing an automated review platform, implementing predictive coding and topic modelling to reduce labor costs and review time in e-discovery.
  - Conducted research and development for classification models, predictive analysis, and mining of text data; monitored output precision for the entire tool.
  - Developed classifier models to identify “red flags” and fraud-related issues in evidence, adhering to EY standards.
- **Multiple Data Science and Analytic Projects (USA Clients):**
- **Text Analytics - Motor Vehicle Customer Review Data:**
  - Performed sentiment (Positive, Negative & Neutral) and time series analysis on one year’s customer feedback data across four categories.
  - Created heat maps of terms by survey category based on word frequency and plotted Word Clouds for positive/negative words.
  - Developed customized Tableau dashboards for effective reporting and visualizations.
- **Chatbot Development:**
  - Developed a user-friendly chatbot for an internal product, handling simple questions, providing overviews via a QA platform, and offering recommendation responses.
  - Engineered intelligence to build question pipelines based on user requirements and suggested relevant questions.
- **Information Governance:**
  - Scanned and parsed data from multiple file formats, extracted metadata, pushed results for Elasticsearch indexing, and created customized Kibana dashboards.
  - Performed ROT (Redundant, Outdated, or Trivial) Analysis to identify content for optimized data storage.
  - Conducted full-text search analysis on Elasticsearch to tag Personally Identifiable Information (PII) frequently targeted during cyber-attacks.
- **Fraud Analytic Platform (FAP):**
  - Contributed to FAP, a Fraud Analytics and investigative platform with an inbuilt case manager and suite of analytics for various ERP systems.
  - Enabled clients to interrogate accounting systems for anomalies which can be indicators of fraud by running advanced analytics.

## Skills

---

**Programming Languages:** Python (pandas, numpy, scipy, scikit-learn, matplotlib), SQL, Java, JavaScript/jQuery

**Machine Learning:** Regression, SVM, Naïve Bayes, KNN, Random Forest, Decision Trees, Boosting techniques, Cluster Analysis, Word Embedding, Sentiment Analysis, Natural Language Processing, Dimensionality reduction, Topic Modelling (LDA, NMF), PCA & Neural Nets

**Database & Visualizations:** MySQL, SQLServer, Cassandra, HBase, Elasticsearch, D3.js, DC.js, Plotly, Kibana, Matplotlib, ggplot, Tableau

**Others:** Regular Expression, HTML, CSS, Angular 6, Logstash, Kafka, Python Flask, Git, Docker, Computer Vision (OpenCV), Deep Learning understanding
