Education

Cairo University

B.E.

May 2013 - May 2017, Giza, Egypt

Experience

Data Scientist

Full-time

Egy-Tech Solutions

June 2023 - Present, Cairo, Egypt

- Developed and deployed auto-preprocessing steps for machine learning, including missing value treatment, outlier detection, encoding, scaling, feature selection, and dimensionality reduction.
- Deployed automated classification and regression models.
- Researched and deployed time series forecasting models: ARIMA, SARIMAX, Holt-Winters, and Prophet.
- Worked on meta-feature extraction problems.
- Implemented a state-of-the-art research paper on outlier detection for mixed attributes.

Skills

Programming: Python

Libraries/Frameworks: Statsmodels, Scikit-learn, SciPy, Keras

Cloud Platforms: AWS

Machine Learning: Machine Learning, Time Series Forecasting, Outlier Detection, Feature Engineering
