Summary

Versatile IT professional with 2 years of experience in Machine Learning, Deep Learning, Data Science, Python, and Software Development at Wipro Technologies. Skilled in managing end-to-end software development life cycles, from requirement gathering to implementation and documentation. Proficient in a wide range of ML/DL algorithms, NLP, and cloud platforms like Google Cloud, with a strong focus on problem-solving and code reusability.

Education

Rayat and Bahra Institute of Engineering and Biotechnology

Percentage: 78.4%

B.Tech (Computer Science)

2016, Mohali, Punjab, India

Relevant Courses: Machine Learning - Deep Learning - Data Science - Algorithms - Neural Networks - Natural Language Processing - Cloud Computing

Experience

Machine Learning Engineer

Full-time

Wipro Technologies

July 2016 - June 2018, Bengaluru, India

- Managed end-to-end development of software products and projects, specializing in Machine Learning, Deep Learning, Data Science, and Python development.
- Contributed to the Wipro Neural Intelligence Platform, leveraging NLP, cognitive computing, machine learning, and analytics for automated user query responses.
- Implemented an Entity Extractor module for text extraction and Natural Language Processing, utilizing Regex, Bluemix NLU APIs, and TensorFlow for continuous entity learning.
- Designed and deployed a Classifier module using Scikit-learn (MNB, SVM, SGD) to predict outputs, optimize query-to-response mapping, and enhance system efficiency.
- Trained a Deep Learning NER Model (RNN-LSTM Bidirectional) with Keras TensorFlow framework to accurately extract entities such as roles, skills, and organizations from raw text.
- Developed programs in Python and demonstrated proficiency in C++, Java, relational databases (MySQL, Oracle), and Google Cloud Platform (GCP).

Projects

Diabetes Detection Software

2016

- Developed a software application capable of detecting whether an individual is suffering from Diabetes.
- Awarded third prize for the innovative solution in a competitive setting.

Certificates

Python Training - Udemy

Machine Learning - Coursera

Deep Learning - Coursera

Awards & Honors

Third Prize - Diabetes Detection Project, 2016

Skills

Programming Languages: Python, C, C++, Java

Machine Learning/AI: Deep Learning, Data Science, NLP, Neural Networks, Keras, TensorFlow, Scikit-learn, KNN, Decision Tree, Linear Regression, Logistic Regression, SVM, K-means Clustering

Libraries/Frameworks: Numpy, Pandas, Seaborn, Matplotlib, Cufflinks

Databases: SQL, MySQL, Oracle

Cloud Platforms: Google Cloud Platform (GCP)

Tools & OS: NetBeans, Jupyter Notebooks, Sublime Text, Linux, Ubuntu, Windows, Service Now, Remedy

Languages

English: Fluent

Hindi: Native
