

Heba Abdel Rahman

Data Scientist

heba.abdelrahman@email.com | +20 101 234 5678 |  github.com/heba-abdel-rahman |  linkedin.com/in/heba-abdel-rahman | hebaabdelrahman.com

Summary

Highly motivated Data Scientist with six months of hands-on experience in Machine Learning, Deep Learning, and NLP. Possesses a strong ability to quickly grasp technical concepts, demonstrating high energy levels and a result-oriented approach to problem-solving and continuous learning.

Education

Master of Engineering in Computer Technology & Application

Truba Institute of Engineering & Information Technology

GPA: Not Provided

January 2018, Bhopal, India

B.E. in Computer Science

RKDF Institute of Science and Technology College of Engineering

GPA: Not Provided

January 2010, Bhopal, India

Polytechnic in Information Technology

SATI Engineering College

GPA: Not Provided

January 2006, Vidisha, India

Experience

Data Scientist

Full-time

RNT.AI Technology Solution

July 2023 - December 2023, Cairo, Egypt

- Developed and implemented text classification models using various Machine Learning algorithms in Python.
- Applied practical knowledge of Deep Learning algorithms, including Recurrent Neural Networks (RNNs), for advanced data analysis.
- Designed and developed custom data models and algorithms to effectively analyze and derive insights from datasets.
- Performed sentiment analysis on textual data to extract valuable insights.
- Utilized classification techniques such as Tf-idf and LSA with cosine similarity to process and analyze leave datasets.
- Implemented web crawling solutions using Selenium WebDriver and BeautifulSoup with Python for data acquisition.

Customer Relations Associate

Full-time

Life Insurance Corporation of India

2010 - 2015, Bhopal, India

- Effectively explained policy features and benefits to customers, ensuring clear understanding.
- Maintained updated knowledge of life insurance products and shared information with customers.

Skills

Machine Learning & AI: Machine Learning, Deep Learning, Natural Language Processing (NLP), Text Classification, Recurrent Neural Networks (RNN), Sentiment Analysis, Tf-idf, LSA, Cosine Similarity

Programming Languages: Python, SQL, HTML, CSS

Libraries & Frameworks: Pandas, Scikit-learn, TensorFlow, NumPy, Matplotlib, NLTK, Selenium WebDriver, BeautifulSoup

Databases: MySQL

Tools & Concepts: Web Scraping, Web Crawling, Custom Data Models, Algorithm Development, Data Analysis
