Education

Aegis School of Data Science & Business	2016
PGP in Data Science	Mumbai, India
IES IPS Academy	2011 – 2015
B.E. in Electronics & Communication	Indore, India

Experience

Data Scientist, Adjunct Faculty	Full-time
Aegis School of Data Science & Business	2017 – Present

- Led industry projects, providing data science solutions along with teaching engagements.
- Taught undergraduate and graduate-level courses in Spark and Machine Learning.
- Mentored 7-12 Data Science enthusiasts annually, all progressing to graduate studies in Data Science and Business Analytics.
- Reviewed and evaluated 20-40 research papers for the Data Science Congress, Aegis School of Business, Mumbai.
- Headed "Data Science Delivered," a solution-providing organization, managing 4-5 live projects using Data Science techniques.

Data Scientist	Full-time
IBM India Pvt Ltd	2016 – 2017

- Leveraged IBM Bluemix and IBM Watson for various data science initiatives and projects.

Data Science Intern	Internship
Aegis School of Data Science & Business	Nov 2015 – Jan 2016

- Furnished executive leadership team with insights, analytics, reports, and recommendations enabling effective strategic planning across all business units, distribution channels, and product lines.

Volunteer Experience

Member	2018 – Present
Data Science for Social Goods Committee	Mumbai, India

- Developed a product called "Let's find a missing Child" to provide social assistance.

Projects

Chat Bot using AWS LEX and Tensor Flow (2023)	Python
--	--------

- Developed a chatbot for academic institutions using AWS LEX and TensorFlow in Python to automate query handling for courses, reducing human effort and errors.

Web Scraping using Selenium Web Driver (2022)	Python
--	--------

- Scraped online messaging portal data into text format using Selenium WebDriver and Python to identify data patterns.

Data Visualization and Data Insights (2021)	Hadoop Eco System, Hive, PySpark, QlikSense
--	---

- Built business solutions for an Internet Service Provider, visualizing daily data generation and identifying usage patterns to generate comprehensive reports.

Image Based Fraud Detection (2020)	Microsoft Face API, PySpark, Open CV
---	--------------------------------------

- Implemented a face recognition system using Microsoft Face API, PySpark, and OpenCV to detect fraudulent loan applications by comparing faces against a database.

Churn Analysis for Internet Service Provider (2019)	R, Python, Machine Learning, Hadoop
--	-------------------------------------

- Identified customers likely to churn for an Internet Service Provider using R, Python, Machine Learning, and Hadoop, enabling proactive incentive offers to retain them.

Sentiment Analysis (2018)

Python, NLP, Apache Spark service in IBM Bluemix

- Conducted sentiment analysis on Twitter data for mobile network service providers to analyze positive, negative, or neutral opinions and capture emotions.

Skills

Programming & Tools: Python (36 months), Spark (24 months), R, Hadoop Eco System, Hive, PySpark, QlikSense, Microsoft Face API, Open CV, Selenium WebDriver, AWS LEX, TensorFlow, Apache Spark, IBM Bluemix, IBM Watson, Tableau (36 months)

Data Science & ML: Machine Learning (24 months), Data Analysis (24 months), Algorithms (6 months), Predictive Modeling, Data-Driven Personalization, Data Mining, NLP, Churn Analysis, Sentiment Analysis, Image-Based Fraud Detection

Business Intelligence & Analytics: Business Intelligence (BI) (6 months), Visualization (24 months), Data and Quantitative Analysis, Decision Analytics, KPI Dashboards, Big Data Queries and Interpretation, Data Mining and Visualization Tools, Research, Reports and Forecasts
