Education

UIT-RGPV

Bachelor of Engineering (B.E.)

May 2017, India

Experience

Data Scientist

Full-time

Matelabs

Jan 2023 - Present

- Developed and deployed auto preprocessing steps of machine learning, including missing value treatment, outlier detection, encoding, scaling, feature selection, and dimensionality reduction.
- Deployed automated classification and regression models.
- Researched and deployed time series forecasting models such as ARIMA, SARIMAX, Holt-winter, and Prophet.
- Worked on meta-feature extracting problems.
- Implemented a state-of-the-art research paper on outlier detection for mixed attributes.

Skills

Programming: Python

Libraries/Frameworks: Statsmodels - Scikit-learn (Sklearn) - Scipy - Keras

Cloud Platforms: AWS

Machine Learning: Machine Learning - Time Series Forecasting - Outlier Detection - Classification - Regression
