

Hanan Ismail

Machine Learning Engineer | Data Scientist

hanan.ismail@email.com | +20 101 234 5678 |  github.com/hanan-ismail |  linkedin.com/in/hanan-ismail | hananismail.com

Summary

Versatile, high-energy IT professional with 2 years of experience in Machine Learning, Deep Learning, Data Science, and Python-based Software Development. Skilled in end-to-end project management, from requirement analysis to deployment, and proficient in leveraging diverse ML algorithms, Python libraries, and cloud environments like GCP. Adept at problem-solving with strong communication and reusability-focused development skills.

Education

Rayat and Bahra Institute of Engineering and Biotechnology

Percentage: 78.4%

B.Tech (Computer Science)

2016, Mohali, India

Experience

Software Developer | Machine Learning Engineer

Full-time

Wipro Technologies

2016 – 2018

- Contributed to the Wipro Neural Intelligence Platform, a comprehensive AI solution leveraging NLP, cognitive computing, machine learning, and analytics.
- Implemented an Entity Extractor using text extraction, NLP, Regex, Bluemix NLU APIs, and TensorFlow for identifying critical information like dates, names, and contact numbers.
- Developed a Classifier for mapping user queries to optimal responses, utilizing SKLearn (MNB, SVM, SGD) and SGD for optimization and training.
- Trained a Deep Learning NER Model (RNN-LSTM Bidirectional with Keras TensorFlow) to extract entities such as roles, skills, and organizations from raw text.
- Managed end-to-end software development lifecycle, including requirements, design, implementation, and documentation for machine learning projects.

Projects

Diabetes Detection Software

- Developed a software application capable of detecting whether an individual is suffering from Diabetes, earning third prize.

Certificates

Python Training – Udemy

Machine Learning – Coursera

Data Science – Udemy

Deep Learning – Coursera

Awards & Honors

Third Prize – Diabetes Detection Software Project

Skills

Programming Languages: Python, C, C, Java

Machine Learning & Deep Learning: Machine Learning, Deep Learning, Neural Networks, NLP,

TensorFlow, Keras, Scikit-learn, K-means, KNN, Decision Tree, Linear Regression, Logistic Regression, SVM

Data Science Libraries: NumPy, Pandas, Seaborn, Matplotlib, Cufflinks

Cloud Platforms: Google Cloud Platform (GCP), IBM Bluemix

Databases: SQL, MySQL, Oracle

Operating Systems: Linux, Ubuntu, Windows

Development Tools: NetBeans, Jupyter Notebooks, Sublime Text, Service Now, Remedy, Regex

Languages

English: Fluent

Hindi: Native
