Summary

Currently working with a Casino based operator in Macau, focusing on customer segmentation to identify high-value patrons. Developed strategies to improve customer segmentation beyond existing systems, providing data-backed insights for targeted marketing and enhanced business value. Experienced in areas of Deep Learning, Control System Design, and Web Development.

Education

Manipal Institute of Technology

B.Tech. Electrical and Electronics Engineering

January 2019, Manipal, India

Experience

Data Scientist / Analyst

On-Site / Remote

Egy-Tech Analytics

January 2023 – Present

- Segmented casino customers in Macau based on patron value to inform targeted marketing strategies.
- Analyzed customer data to demonstrate improved segmentation methods compared to existing systems.
- Provided data-backed insights to enhance business value and customer attraction.

Technical Intern

Internship

Hindustan Aeronautics Limited (HAL)

Summer 2017, Bangalore, India

- Underwent 4 weeks of technical training at Hindustan Aeronautics Limited (HAL) in the hangar of Mirage 2000 fighter aircraft.
- Gained practical insights into aerospace engineering and maintenance procedures under the guidance of Senior Engineer Mr. Satish.

Skills

Programming Languages: Python – Java – Matlab

Web Development: Django – Flask

Data Science & ML: Deep Learning – Machine Learning – Data Analysis – Analytics – SQL – Mathematics

Electrical Engineering: Control System Design – Electric Machinery – LabView – LTSpice (Intermediate) – MIPOWER (Intermediate)

Tools & Platforms: Git (GitHub/GitBash) – Jupyter Notebook – Anaconda – PyCharm – Eclipse – XAMPP – MySQL (Basics)

Operating Systems: Windows – Ubuntu – Debian (Kali Linux)

Software: MS Excel
