Summary

Versatile, high-energy IT professional with 2 years of experience at Wipro Technologies in Machine Learning, Deep Learning, Data Science, Python, and Software Development. Skilled in managing end-to-end product development lifecycle, from requirements to documentation. Possesses expertise in Python, ML/DL algorithms (KNN, SVM, Neural Networks), NLP, and cloud platforms like Google Cloud. Adept at problem solving, with strong interpersonal and communication skills, and an open attitude to change.

Education

Rayat and Bahra Institute of Engineering and Biotechnology

B.Tech in Computer Science

Percentage: 78.4%

2016, Mohali, Punjab, India

Experience

Machine Learning Engineer / Data Scientist

Full-time

Wipro Technologies

2016 - 2018, Cairo, Egypt

- Developed and implemented Python programs contributing to Wipro's Neural Intelligence Platform, harnessing automation, AI (NLP, cognitive, ML, analytics).
- Engineered an Entity Extractor leveraging text extraction, NLP, Regex, Bluemix NLU APIs, and TensorFlow for continuous learning of new entities.
- Designed and implemented a Classifier using SKLearn (MNB, SVM, SGD) for data classification, training, and predictive output, optimizing user query mapping with SGD.
- Trained a Deep Learning NER Model (RNN(LSTM) Bidirectional with Keras TensorFlow) to accurately extract entities such as Roles, Skills, and Organizations from raw text.
- Managed end-to-end software development lifecycle, including requirement specifications, planning, designing, implementation, configuration, and documentation.
- Applied extensive knowledge in Python, Machine Learning, Deep Learning, Data Science, Algorithms, Neural Networks, and Natural Language Processing (NLP).

Projects

Diabetes Detection

- Developed a software application capable of detecting whether a person is suffering from Diabetes.

Certificates

Python Training - Udemy

Machine Learning - Coursera

Data Science - Udemy, Coursera

Deep Learning - Udemy, Coursera

Awards & Honors

Third Prize - Diabetes Detection Project

Skills

Programming Languages: Python - C - C++ - Java

Libraries: Numpy - Pandas - Seaborn - Matplotlib - Cufflinks - Scikit-learn

Algorithms: KNN - Decision Tree - Linear Regression - Logistic Regression - Neural Networks - K-Means Clustering - SVM

ML Frameworks: TensorFlow - Keras

Databases: SQL - Oracle - MySQL

Cloud Platforms: GCP (Google Cloud Platform) - Google Cloud

Operating Systems: Linux - Ubuntu - Windows

Development Environments: NetBeans - Notebooks - Sublime

Ticketing Tools: Service Now - Remedy

AI/ML Concepts: Machine Learning - Deep Learning - Data Science - Natural Language Processing (NLP) - Supervised Learning - Unsupervised Learning - Reinforcement Learning

Languages

English: Fluent

Hindi: Fluent
