Education

University of TN

BS Degree: Electrical Engineering

CGPA: N/A

MAY 2003, Cairo, Egypt

Brockport High School

HS Diploma: General Studies

CGPA: N/A

JUN 1996, Cairo, Egypt

Experience

Information Technology Specialist

Full-time

Vodafone Egypt

07/2004 - Current

- Manage the assigned IT/communications environment with privileged access at the network level for the Wing, Geographically Separated Units (GSU), and Tenants.
- Plan, coordinate, install, and continuously analyze system design, hardware and software.
- Develop, recommend, and install solutions and upgrades to ensure availability, integrity, efficiency, and reliability of all components of the assigned system.
- Ensure all performed work is captured in the Remedy ticketing system.
- Manage Telecommunications and NIPR networks for the Wing, GSU's, and tenant units.
- Continually plan, install, and analyze new hardware, software and processes to ensure networks are reliable and efficient.
- Serve as a focal point for ensuring functionality and operability of the assigned IT/data systems/functions, voice, and wireless systems to support mission requirements.
- Optimize, analyze, manage, and direct installation of any new hardware or software introduced into the environment to ensure its compatibility with existing architecture, its reliability, and functionality in relation to the organization's business requirements.
- Oversee and initiate corrective or preventative measures to rectify immediate problems and prevent future occurrences through the CFP.
- Troubleshoot and diagnose system failures to isolate source of problems.
- Provide customer technical assistance/support for all users.
- Provide management with information necessary to address difficult/complex problems.
- Review purchase requests, SOW's ensuring documentation is sufficient to justify enhancements to keep systems current.
- Work with the CFP/customers to resolve integration or configuration related issues.
- Ensure upgrades to the base IT infrastructure are identified.
- Assist customers in developing/submitting recommendations for equipment and funds.
- Assist personnel in planning/developing new or additional infrastructure/architecture capabilities.
- Coordinate efforts between system customers, support personnel, commercial vendors to identify/resolve system anomalies.
- Conduct feasibility studies to identify and analyze system failures and analyzes data to determine if trends exist which forecast the need for future replacement or modification of system hardware and software.
- As budget constraints dictate, evaluates alternative means of satisfying user requirements and provides management with the most technically feasible and cost efficient approaches to meet changing needs.
- Keep abreast of changes in technology to assist management in preparing for future enhancements.
