Education

Institute of Mechanical Engineering

Diploma in Mechanical Engineering

May 1999 - September 2002, Mumbai, Maharashtra, India

ITES

Diploma in Mechanical Engineering Services

May 1998 - May 1999, Mumbai, Maharashtra, India

Industrial Training Institute

Industrial Training

May 1993 - May 1995, Mumbai, Maharashtra, India

Experience

Sr. Executive - Mechanical Engineering, Automation & Projects Consultant

Egy-Tech Solutions

November 2016 - Present, Cairo, Egypt

- Provide applications support to inside sales personnel and outside sales channels, offer product selection and technical recommendations.
- Participate in training activities to establish technical competency and field service trips as directed by Top Management.
- Assist Brand Managers and/or Product Managers as needed.
- Assist Projects Quotations team with technical aspects, including selection, sizing, and costing of Pneumatic Automation Products, valves, linear & rotary actuators, and field fabrication based on customer data sheets and Engineering Drawings.
- Travel as required to support field sales channels and to promote company products and services.
- Perform detailed reviews of customer specifications, providing comments, clarifications, and alternatives to customer requirements.
- Size and select valves, actuators, and prepare cost-effective techno-commercial quotations and solutions as per customer technical requirements.
- Coordinate with other technical departments as required, in order to minimize technical and cost risk.
- Submit quotations accurately and on-time, including all technical and commercial aspects as per customer documentation requests. Participate in the customer negotiation process, including commercial and technical negotiations.
- Follow up on quotations to close orders and follow up for payment collection.
- Perform PO reviews to ensure all critical elements are correct, address discrepancies with Senior Top Management and customer, and get PO amendment if required.
- Create order transfer files for factory submission in accordance with PO. Support factory for any post-order activities & after-sales service where necessary to develop and maintain good customer service.
- Review and receive RFQs for company products and solutions.
- Estimate Pneumatic Automation Products & Projects, valves, linear & rotary actuators, field equipment, Piping, Fabricated equipment's etc.
- Plot enquiries to vendors for critical bought-out items and continuously follow up with vendors for quotations.
- Apply thumb rules or standard practice of design while estimating for achieving accuracy with less time.
- Analyze & evaluate estimated cost and actual cost of jobs already manufactured to arrive at realistic cost estimates.
- Maintain databanks of all quotations for ready availability to others. Coordinate with Instrumentation & electrical departments for costing.
- Handle estimation department while submitting offers on time. Visit sites for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meetings. Development of vendors.
- Prepare statement enquiries pending for estimation/under progress. Understand client's concern/pain area/requirement, offer suitable & optimized tailor-made or predesigned Chemtronics solutions with techno-commercial proposals that are technically feasible & commercially viable.

- Assign work to Jr. Proposal executives/Engineers. Guide & Coordinate with design, CAD, sales, marketing, project & commercial departments.
- Procure Steel/Raw Material & semi-finished Products based on project requirements.
- Continuously improve negotiation processes & identify cost-saving opportunities.
- Improve turn-around time & develop new vendors for Contract Management & Tenders.
- Achieve target savings against budget and/or last purchase rates & develop new vendors. Obtain quotation and finalization.
- Research and evaluate potential vendors and suppliers, request quotes, perform technical comparisons of Prices, and maintain good relationships with vendors and suppliers.
- Examine and review products and supplies to ensure quality & digitize procurement processes.
- Track incoming & future purchasing plans, Projects inventory, delivery arrival time, and note actual arrival time. Organize and update database of suppliers, delivery times, invoices, and quantity of supplies.
- Collaborate with financial team members on contracts, invoicing, and other financial matters.
- Find suppliers for various materials from product finders as well as from internet sources.
- Create RFQ for materials for projects, departments, for project materials, equipment's and services.
- Review Vendor evaluation & Vendor registration based on Supply time & quality of products.

Manager, Proposal & Projects

Rotex Engineers & Manufacturing Pvt. Ltd

November 2015 - June 2016, Dombivali MIDC, Kaylan, India

- Manage & enhance activities related to proposal of pneumatics/fabrication projects & products.
- Project execution, Vendor development, supply chain management, interacting with vendors to ensure timely action of order & negotiating with the vendor.
- Production design for new manufacturing processes and new product development, customizing solutions (Steel, Power & Cement, petrochemical sector).
- Preparation of technical data sheets as per tender specification.
- Calculate price structure and analyze cost proposals.
- Monitor progress throughout the job & compare it with the schedule of work.
- Maintain fruitful relationships with existing customers.
- Review Vendor evaluation & Vendor registration from Supply time & quality of products.
- Examine and review products and supplies to ensure quality.

Proposal & Estimation Engineer

M/s Duncan Engineering Ltd

July 2014 - October 2015, Pune, India

- Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.
- Work directly with customers to understand their process and develop the best solution for their requirement, lead proposal engineering team & provide technical support to customers.
- Work with sales team to professionally represent the company at a customer, gather data and ask the right questions to define a project.
- Work with engineers and designers to develop and quote cost-effective solutions. Cost estimation, preparing proposals & quotations based on Technical specification of customer requirement & identify production process and machines/bought out item requirements. & coordinate with customers to understand exact requirements.
- Identification of critical problems & work out proper solutions in specified timeframes.
- Production design for new manufacturing processes and new product development. Developing customized manufacturing solutions (Steel, Power & Cement, petrochemical sector).
- Execute cost-saving techniques/measures and modifications to achieve substantial reduction in O & M expenditures and work within the budget.
- Maintain fruitful relationships with existing customers.

Design & Proposal Engineer

M/s Schrader Duncan Ltd

May 2012 - June 2014, Pune, India

- Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.

- Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assemblies along with lay-outs/schematics and/or detailed drawings as per specification.
- Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & perform basic mechanical design, if required.
- Participate in growth & developing innovative solutions with design & development, sales & marketing teams.
- Define, coordinate, perform and generate engineering test reports & engineering analysis.
- In co-ordination with production manager, implement and assure that all manufacturing processes are being followed according to process flow in relevant Departments.
- Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions.
- Maintain records of obsolete documents and remain in touch with all HODs.
- Maintain ISO documents pertaining to ISO9001-2015 and bring awareness among employees.
- Coordinate & communicate with channel partners, O.E.M.s, dealers, consultants & end customers for Design & offer technically feasible solutions.
- Carry out internal audit as per audit plan and schedule, maintain the record of controlled drawings.

Fabrication Field Engineer (Hoist, Goods Lifts)

JOIST- O- MECH Engg. Pvt. Ltd

March 2008 - April 2012, Rabale MIDC, Thane, India

- Detailing of drawing, Preparations of BOM & raw material inspection.
- Prototype manufacturing (3D modeling).

Inspection Engineer

MUKAND LTD

October 2002 - February 2008, Kurla, India

- Raw material inspection, Preparations of Gauge for inspection, marking on housing for machining, checking surface finishing.

Skills

Software & Tools: Microsoft Office (Word, Excel) - AutoCAD - MicroStation J - ERP - 3D Modeling Software
