Summary

Highly detail-oriented and experienced QA/QC Civil Engineer with over a decade of expertise in managing quality assurance and control programs for large-scale construction projects in the oil & gas, pharmaceutical, and residential sectors. Proven ability to develop method statements, conduct site inspections, ensure compliance with specifications, and manage comprehensive QA/QC documentation.

Education

Anna University

B.E. in Civil Engineering

2010, Chennai, India

Experience

QA/QC Civil Engineer

On-Site

Ray Engineering Limited

March 2016 - Present

- Managed all site inspections through official Inspection and Test Requests (ITR) submitted by contractors.
- Developed method statements, including risk assessments, job safety environmental analyses, Inspection Test Plans (ITP), and checklists based on project specifications.
- Oversaw QA/QC documentation for the entire project, including certificates, calibration records, test results, inspection requests, non-compliance reports, and site instructions for Glaxo Smith Kline (GSK) project in Nashik, India.
- Supervised and ensured construction adherence to final issued-for-construction drawings and project specifications.
- Conducted joint inspections with consultants and clients for project compliance.
- Monitored and controlled the status of punch lists and exception lists relevant to quality dossiers.

QA/QC Civil Engineer

On-Site

Gulf Asia Contracting Co LLC

April 2014 - February 2016

- Organized, implemented, conducted, and managed QA/QC Programs as per the Company's Quality Policy for Geepas Tower project in Dubai, UAE.
- Coordinated document controls for technical submittals and drawings with the Project Team, ensuring QA/QC validation, issue, amendments, and recall of controlled documents.
- Coordinated all inspections, monitored required tests, and recorded inspections and tests per Contract Plan and Specifications.
- Liaised with Client's representatives for day-to-day quality-related project activities.
- Coordinated with the Project Manager regarding work performance, with authority to stop work for uncorrected discrepancies and cancel stop work orders upon satisfactory correction.
- Provided technical support and guidance to site staff for submission of materials, inspection requests, shop drawings, As-built drawings, and O & M manuals.
- Assisted QA/QC Manager in conducting internal quality audits.
- Ensured Non-Conformance Reports (NCR) were raised for activities deviating from Contract Specifications or standard construction practices.
- Coordinated with project staff to compile and maintain pertinent inspection and testing records until contract completion.
- Attended Monthly Project Review Meetings (PRM) and alerted the project team to potential problems.

QA/QC - Civil Engineer

On-Site

Ray Engineering Limited

April 2012 - March 2014

- Managed QA/QC documentation for the entire Petronet LNG project in Dahej, Gujarat, India, including certificates, calibration records, test results, inspection requests, non-compliance reports, and site instructions, and ensured closure of Non-conformances and Site Instructions.
- Maintained safety standards and complied with Company's Health, Safety and Environment requirements.

- Performed daily inspections and tests to achieve the quality of construction required in drawings and specifications for all on or off-site works.
- Carried out inspections and checks for all quality-related procedures, ensuring site activities complied with approved method statements and Inspection Test Plans.
- Coordinated with the consultant's representative and Site In-charge for inspections and meetings regarding quality problems, including closure of Non-Compliance Reports.

Civil Engineer

On-Site

High View Builders

July 2010 - March 2012

- Ensured understanding and application of all responsibilities regarding company's environment, Health, Safety, Security and Quality standards for G + 8 Floor Building project in Kerala, India.
- Ensured required materials and PPEs were available for smooth and safe job execution in advance.
- Proactively supported the project engineer throughout the project duration.
- Maintained accurately detailed daily site reports for site conditions, progress, and resources across all project phases.
- Coordinated with sub-contractors and suppliers at the site.
- Coordinated with employees for timely completion of work.
- Deployed workers at the site as per schedule and maintained labor cards.
- Conducted weekly meetings with the project engineer to discuss work progress.
