Education

Vidyalankar Institute of Technology

B.E. Information Technology

June 2016, Goregaon, MAHARASHTRA, IN

Thakur Polytechnic

Diploma

May 2013, Mumbai, Maharashtra, IN

Experience

Java Developer

Tech Mahindra

On-Site

September 2016 - May 2018

- **Project: OR-Formatter**
- Developed an application processing Geneva Modified File (GMF) from a Geneva server to generate Bill backup and Bill Invoices for BT client customers.
- Applied change requests to current modules, performed requirement analysis, development, and unit testing for user stories.
- Handled end-to-end issues, fixed bugs, and prepared required program-level and user-level documentation.
- **Project: STAA (Service Transformation & Aggregation Adapter)**
- Implemented STAA as an encapsulation middleware layer, interfacing client's operational support systems and Legacy systems.
- Transformed legacy data into various formats (e.g., TLV), validated XML/HTTP input, and sent responses to CSS and COSMOSS Databases.
- Created services using Java/J2EE, performed requirement analysis, development, and unit testing for user stories.
- Handled end-to-end issues, fixed bugs, and managed migration from Java 1.6 to Java 1.8.

Skills

Programming Languages: Java/J2EE - Swift - HTML - Shell script - SQL

Databases: MySQL

Tools & Technologies: SVN - Jenkins - Hudson - Weblogic12c - Android Studio - Eclipse - Oracle - Xcode

Operating Systems: Windows 10 - Mac (High Sierra)
