Education

Master of Engineering, Information Technology

M.I.T

January 2013

Pune, Maharashtra, India

Bachelor of Engineering, Information Technology

Amravati University

January 2005

Pusad, Maharashtra, India

Experience

Java Developer

Infrasoft Technologies

Present

Mumbai, India

- Currently working as a Java Developer in Infrasoft Technologies, focusing on application development and maintenance.

Java Developer

Maxgen Technologies

Dates Not Provided

Pune, India

- Contributed to the development and implementation of Java-based software solutions.

Projects

Data Deduplication (ME Project)

Java • Developed a system to reduce redundant data from the system and free up memory.

- Stored unique copies of data and utilized pointers for accessing the same data from multiple locations.

Location Detector of Computing and Mobile Devices

Android • Designed and implemented an Android mobile application for detecting locations of computing and mobile devices.

Certificates

Android - Mobile App Development - NIIT, 2015-2016

Technologies in Java (Core Java, Advance Java, JSF, Hibernate, Spring) - NIIT, 2015-2016

Publications

A secure cipher index over encrypted character data in database., National Conference, Pimpri Chinchwad College of Engineering, Pune, April 2011

Skills

Programming Languages: C - C++ - Java - Android

Databases: MS Access - SQL - Oracle

Technical Domains: C language - Core Java - Object Oriented Programming (OOT/C++) - Database - Programming and Problem Solving (PPS) - Advance Database (AD) - Information Assurance and Security (IAS) - Android

Extracurricular Activities

Instructor (Subjects Taught)

Dates Not Provided

Academic Institution

- Provided instruction in core computer science subjects including C language, Core Java, and Object Oriented Programming (OOT/C++).
- Taught specialized topics such as Database, Programming and Problem Solving (PPS), Advance Database (AD), Information Assurance and Security (IAS), and Android development.
