Education

Vidyalankar Institute of Technology

B.E. Information Technology

June 2016, Goregaon, Maharashtra, India

Thakur Polytechnic

Diploma in Engineering

May 2013, Mumbai, Maharashtra, India

St. John's Universal School

High School Diploma

May 2010, Mumbai, Maharashtra, India

Experience

Java Developer

Full-time - On-site

Tech Mahindra

September 2017 – May 2018, Cairo, Egypt

- Managed the OR-Formatter application, processing Geneva Modified File (GMF) inputs to generate Bill backup and Bill Invoices for BT clients.
- Played the role of Java developer involved in applying change requests to current modules.
- Worked on requirement analysis and development for user stories and performed dev unit testing.
- Handled E2E issues and fixed bugs, ensuring system stability.
- Prepared required program-level and user-level documentation.

Java Developer

Full-time - On-site

Tech Mahindra

June 2016 – August 2017, Cairo, Egypt

- Developed and maintained the STAA middleware layer, creating services using Java/J2EE for seamless integration with client operational support systems.
- Transformed legacy data into various formats (e.g., TLV) from XML/HTTP inputs, ensuring robust data validation.
- Deployed business methods as EJBs on Weblogic12c Server, supporting multiple market-facing units.
- Conducted requirement analysis, development for user stories, and dev unit testing.
- Resolved E2E issues and bug fixes, ensuring high system availability.
- Successfully migrated Java 1.6 to Java 1.8, enhancing platform compatibility and performance.

Skills

Programming Languages: Java/J2EE - Swift - HTML - Shell Script

Databases: MySQL - Oracle

Tools & Technologies: SVN - Jenkins - Hudson - Weblogic12c - Android Studio - Eclipse - Xcode

Operating Systems: Windows 10 - Mac (High Sierra)
