Education

Cairo University

Master of Engineering in Information Technology

January 2013

Cairo, Egypt

Alexandria University

Bachelor of Engineering in Information Technology

January 2005

Alexandria, Egypt

Relevant Courses: C language - Core Java - Object Oriented Programming (OOT/C++) - Database - PPS (Programming and Problem Solving) - AD (Advance Database) - IAS (Information Assurance and Security) - Android

Experience

Java Developer

Egy-Tech Solutions

Full-time

2021 - Present

- Developing and maintaining robust Java-based applications, contributing to full software development lifecycle.

Software Engineer

NileSoft Systems

Full-time

2018 - 2021

- Managed and optimized Management Information System (MIS) generation for key clients, including major telecom and power providers.
- Collaborated with cross-functional teams to deliver high-quality software solutions.

Projects

Location Detector of Computing and Mobile Devices (Android)

- Developed an Android application for location detection of mobile and computing devices.

Data Deduplication (Java)

- Engineered a data deduplication system in Java to reduce redundant data and optimize memory usage.
- Implemented a mechanism to store unique data copies with pointer-based access for efficient retrieval.

Certificates

Android - Mobile App Development - NIIT, 2015-16

Technologies in Java (Core Java, Advance Java, JSF, Hibernate, Spring) - NIIT, 2015-16

Publications

A secure cipher index over encrypted character data in database., Amal Nasser, Pimpri Chinchwad College of Engineering, 2011

Skills

Programming: C - C++ - Java - Android

Databases: MS Access - SQL - Oracle

Frameworks & Tools: JSF - Hibernate - Spring

Concepts: Object Oriented Programming (OOT/C++) - Database Management - Programming and Problem Solving (PPS) - Information Assurance and Security (IAS)
