Experience

Java Developer

Xoriant Solutions Pvt Ltd

Sept' 2017 – Present, Pune, MAHARASHTRA, IN

- Developed various modules from backend to middleware to frontend for Hertz's ResRent portfolio, handling screens and acting as a primary control function.
- Designed and developed webservices to facilitate XML and JSON interactions, integrating them into Hertz's internal systems for end-user interfaces.
- Performed bug fixing and proactively developed enhancements to improve application functionality and user experience.
- Resolved application incidents within defined SLAs and managed task ticket creation and resolution.
- Debugged and provided solutions for workflow issues, ensuring smooth application operations.
- Addressed database issues and offered technical support to Business Analysts (BAs).
- Monitored deployments and assessed their impact on ongoing jobs and processes.
- Contributed to the automation of daily activities and organizational processes, enhancing efficiency.
- Ensured on-time, within-budget delivery of solutions, consistently meeting customer quality expectations.
- Maintained a comprehensive knowledge base of domain specifics, known defects, issues, processes, and development techniques.

Skills

Programming Languages: Java - SQL - PL/SQL - C - C++
