Projects

Inlight (Supplier Risk Assessment Application)

Feb 2018 - Present

- **Platform:** .Net
- An application designed to assess the Suppliers within the Supply chain. The Application onboards Importers, Exporters and Suppliers. Based on the role, a Questionnaire is assigned to them. Based on the answers, a scoring methodology is defined and the Suppliers are assessed to be Critical, High, Medium and Low, helping to assess the risk involved in working with certain Suppliers.

CRM (Sales Management System)

Nov 2017 - Feb 2018

- **Platform:** Microsoft D365
- A software solution for handling Sales Management. This Microsoft product helps in tracking company sales, salesperson activities, and provides a 360-degree view of customer accounts. It serves as a platform for salespersons to provide details of Leads, Opportunities, Accounts and Businesses, available on Cloud.

Credit Risk (Customer Credit Check Management System)

Nov 2017 - Feb 2018

- **Platform:** .Net
- A software solution for checking the credit status of customers. The software is designed to take KYC and consent from the customer. For consenting customers, credit and monitoring reports are obtained from the Credit Bureau. Based on these reports, customer health can be determined and business with them can be continued or discontinued.

TANGO (Sea & Air Cargo Management System)

Jun 2012 - Oct 2017

- **Platform:** Java
- A software solution for handling sea and air cargo (Import & Export) Management. TANGO manages shipment creation and tracking via multiple service legs (e.g., Pick-up, Delivery). It helps in managing the end-to-end shipment with respect to the entire department involvement globally.
