Projects

F-MAS (Frequency Monitoring and Analysis Systems)

- F-MAS is a project for managing network inventory, network communication, fault management & network traffic analysis.
- The telecommunications service providers, are used to support a range of telecommunication services.
- The Operations Support Systems (OSS) collectively provides support for various elements used in Public Switched Telephone Networks, for example processing an order may require information on the services the customer already has, the network they are using, and currently available resources.

Certificates

Skills

Languages: Python

Python Frameworks: Django - DRF

Databases: MySQL - Oracle - Sqlite - MongoDB

Web Technologies: CSS - HTML - RESTful Web Services

Methodologies: Agile - Scrum

Version Control: Github

Project Management Tool: Jira

Operating Systems: Window - Unix
