

Karim Abdel Rahman

Cloud Operations Architect (DevOps)

karim.abdelrahman@email.com | +20 100 123 4567 |  github.com/karim-abdel-rahman |  linkedin.com/in/karim-abdel-rahman

Education

Symbiosis Institute

Post Graduate Diploma, Information Technology

Pune, Maharashtra

January 2013

Pune University

Bachelor of Engineering, Electronics and Telecommunications

Pune, Maharashtra

January 2007

Experience

DevOps Engineer

Full-time

Egy-Tech Solutions

January 2020 - Present

- Managed Tibco Spotfire Enterprise & Cloud environments; recruited and built an operations team of 15 members in India.
- Led four concurrent projects, coordinating team efforts and managing product support responsibilities for AWS and Azure platforms.
- Coordinated production deployments, hot-fixes, and provided pre-production environment support for QA teams.
- Developed automation scripts using Shell and AWS Lambda to manage AWS resources, such as shutting down unused EC2 instances and releasing free Elastic IPs.
- Utilized a suite of AWS services including EC2, RDS, CloudFormation, Dynamo DB, CloudWatch, Auto-scaling, and Elastic Beanstalk.

System Administrator

Full-time

Synechron Technologies Limited

November 2016 - December 2019

- Administered Linux media server farms and provided critical application support.
- Managed server patching for physical and Linux-Xen virtualized environments using Puppet and Red Hat Satellite server.
- Automated system administration tasks using shell scripting and provided support for MySQL databases.
- Troubleshoot and resolved issues related to customized applications to ensure operational stability.

System Engineer

Full-time

Tsys Limited

August 2014 - October 2016

- Managed user access control for RHDS, CVS, and other internal project servers and VDI environments.
- Implemented and maintained MySQL database replication across multiple Linux servers for high availability.
- Developed shell scripts to automate repetitive tasks, improving system and team efficiency.
- Analyzed project requirements to plan and implement required server environments and user access policies.

Senior System Engineer

Full-time

Patni Computer Systems Limited

June 2012 - August 2014

- Provided L1 support for the Genworth Imaging Solutions project, monitoring P8 Filenet applications and handling user tickets.
- Administered 10 Linux Proxy servers and MySQL servers, including implementing replication and monitoring user activity logs.
- Handled database administration tasks for Oracle and MySQL, including writing SQL queries, bug-fixing, and executing backups.
- Ensured the stability of critical applications (e.g., eProcess, Trexo) and customized Filenet instances.
- Authored and deployed a shell script to production to automate the deletion of logs older than five days.

Skills

Cloud & DevOps: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Azure, Automation, Puppet, Appdynamics

Scripting: Shell Scripting, Python

Databases: MySQL, Oracle, SQL

Operating Systems: Linux/Unix, IBM AIX, Windows

Other Technologies: P8 Filenet, Red Hat Satellite, Linux-Xen, HTML
