Experience

Project Manager

Mumbai, India

Aditya Birla Group

Apr 2013 - Present

- Manage project management processes for ongoing initiatives, coordinating with internal development teams, vendors, and QA teams to ensure project delivery.
- Oversee information security audits, budget management (CAPEX/OPEX), and monitoring of database servers, web servers, and cloud-based infrastructure.
- Track project activities across multiple teams and generate monthly KPI reports for senior management.
- Administer all SharePoint Portal activities, including management of functional, technical, and business documentation.
- Contribute to the Technology Road map group, evaluating and planning for the adoption of new technologies like IoT, Virtual Reality, Machine Learning/AI, and 3D Printing.

Technical Project Manager

Mumbai, India

eClerx Software Service

2012 - 2013

- Led the "Dell Site Search/Natural Search DB" project, utilizing technologies including ASP.NET 4.0, C#, WCF, SSRS, and SQL Server 2008 R2.

Project Consultant

Mumbai, India

Annet Technologies

2009 - 2012

- Administered project progress against scheduled deadlines, implementing strategies to ensure completion within time and budget constraints.
- Interfaced directly with clients for requirements gathering, system analysis, and finalization of technical specifications to ensure alignment with business needs.
- Managed all project documentation within a SharePoint environment and performed comprehensive SharePoint administrative duties.

Programmer Analyst

Sunnyvale, CA, USA

Northbound Software LLC

2008 - 2009

- Developed and maintained applications for diverse clients, including a "Logistic Transport System" for a client in Ohio and the "Biz Automation CRM" in California.
- Contributed to a project for Wachovia in North Carolina, working with ASP.NET, C#, WCF, and SQL Server 2005.

Project Lead / Technical Architect

Mumbai, India

Reliance ADA Group

2006 - 2007

- Led development for key internal systems in the Manufacturing and Human Resource domains, including the "Complain Management System" and "PF Trust System".
- Utilized ASP.NET, C#, Oracle 8i/9i, PL/SQL, and SAP Connector to build robust enterprise solutions.

Projects
