

Tarek Ali

Cloud Operations Architect (DevOps)

tarek.ali@email.com | +20 100 123 4567 |  github.com/tarek-ali |  linkedin.com/in/tarek-ali

Education

Symbiosis Institute

Post Graduate Diploma, Information Technology

Jan 2013

Pune, Maharashtra

Pune University

Bachelor of Engineering, Electronics and Telecommunications

Jan 2007

Pune, Maharashtra

Experience

DevOps Engineer

Egy-Tech Solutions

On-Site

Jan 2018 - Present

- Managed Tibco Spotfire enterprise & Cloud product support environments on AWS and Azure.
- Recruited and built an entire operations team of 15 members; simultaneously managed 4 different products and integrated new team members into these projects.
- Supported the India QA team by managing pre-production testing environments.
- Coordinated production deployments, hot-fixes, and arranged workshops on new AWS services for the team.
- Authored a shell script to automate the shutdown of running AWS instances for cost optimization.
- Developed a shell script to identify and release unused Elastic IPs (EIPs).
- Implemented AWS Lambda functions to trigger critical automation scripts.
- Utilized AWS services including EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, and Elastic Beanstalk.

Systems Administrator

Synechron Technologies Limited

On-Site

Apr 2015 - Dec 2017

- Managed large-scale Linux media server farms and provided comprehensive application support.
- Performed system-wide patching for both physical Linux and Xen virtualized servers.
- Created and managed software channels using Red Hat Satellite server for streamlined deployment.
- Automated administrative tasks through advanced shell scripting and provided MySQL DB support.
- Diagnosed and resolved issues with customized applications running on the platform.

System Engineer

Tsys Limited

On-Site

Feb 2013 - Mar 2015

- Managed user access control for RHDS, CVS, and internal project servers.
- Administered user permissions on development and production VDI servers.
- Analyzed project requirements to plan environment setup and required access controls.
- Implemented and maintained MySQL replication across multiple Linux servers.
- Conducted performance tuning on existing applications and tested/debugged automation scripts.

Senior System Engineer

Patni Computer Systems Limited

On-Site

Feb 2007 - Apr 2009

- Provided L2/L3 support for the Genworth Imaging Solutions maintenance project (Project: CPI).
- Monitored and maintained P8 Filenet application health and performance.
- Administered 10 Linux Proxy servers and multiple MySQL servers, including implementing replication and back-ups.
- Developed complex SQL queries for client reporting and handled Oracle database administration tasks.
- Managed application support for customer-facing tools like eProcess and Trexo.
- Wrote and deployed a shell script to production servers for automated log rotation, deleting logs older than five days.

Skills

Cloud Platforms: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Microsoft Azure

DevOps & Automation: Shell Scripting, Automation, Puppet, Appdynamics

Databases: MySQL, Oracle, SQL

Operating Systems: Linux/Unix, IBM AIX, Linux-Xen

Other Technologies: Python, P8 Filenet, Red Hat Satellite Server, HTML
