Education

Symbiosis Institute

Post Graduate Diploma, Information Technology

Jan 2013

Pune, Maharashtra

Pune University

Bachelor of Engineering, Electronics and Telecommunications

Jan 2007

Pune, Maharashtra

Experience

Cloud Operations Architect

Egy-Tech Solutions

Jan 2020 - Present

Cairo, Egypt

- Managed Tibco Spotfire enterprise and cloud product support, including production deployments and hot-fixes.
- Recruited, built, and led an entire operations team of 15 members in India.
- Simultaneously managed 4 distinct projects and products, integrating new team members effectively.
- Arranged and conducted workshops on new AWS services for the entire team to foster skill development.
- Automated cloud infrastructure tasks using shell scripting and AWS Lambda functions.
- Tech Stack: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Azure, Appdynamics.

System Administrator

Synechron Technologies Limited

Jun 2016 - Dec 2019

Cairo, Egypt

- Managed large-scale Linux media server farms and provided comprehensive application support.
- Automated system administration tasks using shell scripting and Puppet for configuration management.
- Performed regular patching and updates on Linux physical and Xen virtualized servers.
- Created and managed software channels on Redhat Satellite server for package distribution and system management.
- Provided support for MySQL databases and troubleshoot customized applications to ensure stability.

System Engineer

Tsys Limited

Mar 2013 - May 2016

Giza, Egypt

- Managed user access for RHDS, CVS, and internal project servers, ensuring security and proper permissions.
- Automated routine tasks using shell scripting and provided MySQL database support.
- Implemented and maintained MySQL replication across Linux servers for high availability and disaster recovery.
- Analyzed project requirements to plan and configure development and production environments.
- Tested, debugged, and fine-tuned new and existing application scripts for optimal performance.

Senior System Engineer

Patni Computer Systems Limited

Jan 2011 - Feb 2013

Alexandria, Egypt

- Provided L2 support for the Genworth Financial CPI project, maintaining applications on P8 Filenet and Oracle DB.
- Administered a fleet of 10 Linux proxy servers and multiple MySQL servers, including implementing replication.
- Monitored P8 Filenet application health and handled user-raised support tickets in a timely manner.
- Wrote and executed complex SQL queries against Oracle and MySQL databases for reporting and client needs.
- Developed and deployed a shell script to production for automated log rotation, deleting logs older than five days.
- Ensured high availability of customer-facing applications such as eProcess and Trexo.

Projects

AWS & Linux Automation Scripts

2011 - Present

- Developed a shell script to identify and shut down running AWS EC2 instances to optimize costs.
- Created a script to find and release unutilized Elastic IP addresses in AWS.
- Authored a Lambda function to automate the execution of critical maintenance scripts.
- Wrote and deployed a production script to automatically delete logs older than five days on Linux servers.

Skills

Cloud & DevOps: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB), Azure, DevOps, Puppet, Appdynamics

Programming & Scripting: Shell Scripting, Python, SQL, HTML

Databases: MySQL, Oracle

Operating Systems: Linux, Unix, IBM AIX, Windows
