Education

JNTU

Masters of Science in Information Technology

Hyderabad, Telangana

June 2015 - June 2017

Experience

Devops Engineer

Nendrasys Technologies Pvt Ltd

June 2017 - Present

- Detailed technical knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files.
- Creating Repositories, branches, managing user permissions and maintaining GIT and Bitbucket.
- Deploying and maintaining code and applications, and configuring components to increase reusability.
- Working closely with Architecture, Development, Test, Security and IT Services teams.

Projects

Sloan Global Holdings (Sloan) - E-commerce Platform

Nendrasys Technologies Pvt Ltd

- The scope of the project was to design and develop e-commerce product features for a B2B project where customers can buy fixtures, sinks, and related products.
- Communicated daily with the on-site team, analyzed requirements, identified gaps, and tracked logs and issues.
- Supported Business Analysts in getting used to the newly created jobs and Release activities.
- Focused on the company, stakeholders and applications to allow for online sales, distribution and marketing of products.

Bangkok Bank Limited (BBL) Thaitrade - E-commerce & Payment Portal

Nendrasys Technologies Pvt Ltd

- Developed a B2B/B2C e-commerce payment portal system to support multiple merchants with various online and offline payment options.
- Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
- Analyzed and resolved conflicts related to merging of source code for GIT.
- Implemented a Master-Slave architecture to improve the performance of Jenkins.
- Handled end-to-end deployments and code propagations across different environments from DEV to PROD.
- Created and maintained documentation of build, release processes, and application configuration.

Skills

CI/CD & DevOps: Jenkins - Ansible - Continuous Integration and Continuous Deployment (CI/CD)

Build Tools: Ant - Maven

Version Control: GIT - Bitbucket

Scripting & Languages: Shell Scripting - Core Java - C

Application Servers: Apache Tomcat

Methodologies: Software Development Life Cycle (SDLC) - Software Testing Life Cycle (STLC) -

Requirement Gathering - Documentation & Reporting
