

Eslam Kamal

Cloud Operations Architect (DevOps)

eslam.kamal@email.com | +20 100 123 4567 |  github.com/eslam-kamal |  linkedin.com/in/eslam-kamal

Education

Symbiosis Institute	Pune, Maharashtra
Post Graduate Diploma, Information Technology	Jan 2013
Pune University	Pune, Maharashtra
Bachelor of Engineering, Electronics and Telecommunications	Jan 2007

Experience

DevOps Engineer	Full-time
Egy-Cloud Solutions	2020 - Present
- Managed Tibco Spotfire enterprise and cloud product support, overseeing both environments. - Recruited, built, and led a new operations team of 15 members in India. - Simultaneously managed 4 different projects/products, integrating new team members effectively. - Supported the India QA team by maintaining the pre-production environment for testing. - Coordinated production deployments and time-sensitive hot-fixes to ensure minimal downtime. - Organized and led workshops on new AWS services (EC2, RDS, Lambda, CloudFormation) for the entire team.	
Systems Administrator	Full-time
Synechron Technologies Limited	2017 - 2020
- Managed extensive Linux media server farms and provided application-level support. - Automated administrative tasks and provided MySQL database support using advanced shell scripting. - Responsible for patching Linux physical and Linux-Xen virtual servers using Red Hat Satellite server. - Created and managed software channels on the Satellite server for streamlined deployment. - Troubleshoot and resolved complex issues within customized applications.	
Systems Engineer	Full-time
Tsys Limited	2015 - 2017
- Managed user access control for critical development servers, including RHDS, CVS, and dot project servers. - Administered user permissions on both development and production VDI servers. - Automated routine tasks by developing and maintaining shell scripts. - Implemented and managed MySQL replication across Linux servers to ensure data redundancy and availability. - Analyzed project requirements to plan and implement secure environment and access control policies.	
Senior System Engineer	Full-time
Patni Computer Systems Limited	2013 - 2015
- Provided L2/L3 support for a suite of applications on the P8 Filenet platform for the client, Genworth Financial. - Administered 10 Linux Proxy servers and multiple MySQL servers, including implementing and maintaining database replication. - Monitored P8 Filenet applications, handled user-generated tickets, and analyzed system logs for security and performance. - Developed complex SQL queries for client reporting and data manipulation in Oracle and MySQL databases. - Ensured high availability of customer applications such as eProcess and Trexo.	

Projects

AWS Cloud Resource Optimization Scripts	2021
- Wrote a shell script to extract a list of running AWS instances and automatically shut them down to reduce costs. - Developed a shell script to identify and release unattached Elastic IP (EIP) addresses to prevent unnecessary charges. - Authored an AWS Lambda function to trigger these resource management scripts on a regular schedule for hands-free automation.	
Automated Log File Management System	2014
- Authored a robust shell script to automatically delete log files older than five days, freeing up critical disk space. - Successfully deployed the script across multiple production Linux servers, enhancing system performance and stability.	

Skills

Cloud Platforms: AWS (EC2, RDS, Lambda, CloudFormation, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Microsoft Azure

Scripting & Automation: Shell Scripting, Python, Puppet

Databases: MySQL, Oracle, SQL

Operating Systems: Linux/Unix, IBM AIX

Concepts: DevOps, Cloud Architecture, Automation, Solution Design, IT Operations, Monitoring, Appdynamics
