Education

JNTU

Masters of Science, Information Technology

Hyderabad, Telangana

June 2015 - June 2017

Experience

Devops Engineer

Nendrasys Technologies Pvt Ltd

Hyderabad, India

- Demonstrated detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins, Ant, Maven, and Shell scripting.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Managed version control systems (GIT, Bitbucket), including creating repositories, branches, managing user permissions, and resolving merge conflicts.
- Deployed and maintained code and applications, configuring components to increase re-usability across different environments from DEV to PROD.
- Worked closely with Architecture, Development, QA, Test, Security, and IT Services teams to ensure smooth release cycles.
- Participated in weekly release meetings to identify and mitigate potential risks associated with software releases.
- Created and maintained comprehensive documentation of build/release processes and application configurations.

Projects

Bangkok Bank Limited (BBL) ThaiTrade (Commercial, E-commerce & Payment portal)

- Developed a B2B/B2C e-commerce payment portal system for BBL, enabling multiple merchants with various online and offline payment options. The project involved a partnership with Thai Trade, a leading e-commerce website, to enhance online sales, distribution, and marketing of electronics.

Sloan Global Holdings (Sloan) (E-commerce)

- Designed and developed B2B e-commerce product features for the Sloan project. The platform allows customers to purchase fixtures, sinks, and related products, focusing on online sales, distribution, and marketing of company products.

Skills

CI/CD & Automation: Jenkins - Ansible

Build Tools: Ant - Maven

Version Control: GIT - Bitbucket

Scripting: Shell Scripting

Programming Languages: Core Java - C

Application Servers: Apache Tomcat

Methodologies: DevOps - SDLC - STLC - Continuous Integration - Continuous Deployment

Professional Skills: Requirement Gathering - Documentation & Reporting - Change Management
