

Mona Said

Cloud Operations Architect (DevOps)

mona.said@email.com | +20 101 234 5678 |  github.com/mona-said |  linkedin.com/in/mona-said

Education

Symbiosis Institute

Post Graduate Diploma in Information Technology

Pune, Maharashtra

January 2013

Pune University

Bachelor of Engineering in Electronics and Telecommunications

Pune, Maharashtra

January 2007

Experience

Cloud Operations Architect (DevOps Engineer)

On-Site

Egy-Tech Solutions

Jan 2021 - Present

- Managed Tibco Spotfire enterprise & Cloud product support on AWS and Azure cloud platforms.
- Recruited, built, and led an entire DevOps team of 15 members.
- Simultaneously managed 4 different products/projects and integrated new team members.
- Coordinated production deployments and hot-fixes to ensure smooth release cycles.
- Supported the India QA team by managing the pre-production environment for testing.
- Arranged and led workshops on new AWS services for the entire team, including EC2, RDS, Lambda, and Cloud-Formation.

Administration & Automation Engineer

On-Site

Synechron Technologies Limited

Feb 2015 - Dec 2020

- Managed Linux media server farms and provided comprehensive application support.
- Automated system administration tasks using shell scripting and Puppet.
- Oversaw patching of physical Linux machines and Linux-Xen virtual servers.
- Created and maintained Satellite channels on Red Hat Satellite server for software distribution.
- Provided MySQL database support and troubleshooted customized applications.

Development & Automation Engineer

On-Site

Tsys Limited

Feb 2013 - Jan 2015

- Managed user access controls for RHDS, CVS, and dot project servers.
- Administered user access on development and production VDI servers.
- Implemented and maintained MySQL replication across Linux servers for high availability.
- Automated repetitive tasks using shell scripting to improve operational efficiency.
- Analyzed project requirements to plan environments and required access levels.
- Tested and debugged scripts to ensure error-free deployment and execution.

Senior System Engineer

On-Site

Patni Computer Systems Limited

Nov 2010 - Jan 2013

- Provided L2 support for the Genworth Financial client, maintaining insurance document processing applications.
- Administered P8 Filenet application, 10 Linux Proxy servers, and MySQL servers.
- Handled user-raised tickets and monitored application logs (eProcess, Trexo).
- Developed and deployed shell scripts for automation, such as log file management.
- Managed Oracle and MySQL databases, including replication, backups, and query optimization.
- Prepared and executed SQL queries (insert, select, update) for client reporting and bug fixing.

Projects

Automation Scripts

2013 - Present

- Wrote a shell script to programmatically extract a list of running AWS instances and shut them down to manage costs.
- Developed a shell script to identify and release unattached Elastic IP (EIP) addresses in AWS.
- Created an AWS Lambda function to trigger the execution of critical automation scripts based on events.
- Authored a script to delete log files older than five days, successfully deployed to production servers to manage disk space.

Awards & Honors

U.S. B1 Business Visa Holder

Completed multiple onsite client visits in Sweden and Seattle, USA

Skills

Cloud Technologies: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Azure

DevOps & Automation: Shell Scripting, Puppet, Appdynamics

Databases: MySQL, Oracle, SQL

Programming & Web: Python, HTML

Operating Systems: Linux/Unix, IBM AIX, Windows

Architectural & Other: Solution Architecture, P8 Filenet, Redhat Satellite Server, Linux-Xen
