Education

JNTU

Master of Science, Information Technology

June 2015 - June 2017

Hyderabad, Telangana

Experience

DevOps Engineer

Full-time

Nendrasys Technologies Pvt Ltd

Cairo, Egypt

- Demonstrated detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Created fully automated CI/CD build and deployment infrastructure and processes for multiple projects.
- Developed and maintained scripts for build, deployment, and related tasks using Jenkins, Ant, Maven, and Shell scripting.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Managed version control systems including creating repositories, branches, and user permissions for GIT and Bitbucket; analyzed and resolved merge conflicts.
- Deployed and maintained code and applications, configuring reusable components to increase efficiency.
- Implemented a master-slave architecture for Jenkins to improve performance and scalability.
- Handled end-to-end deployments and code propagation across various environments from DEV to PROD.
- Worked closely with Architecture, Development, QA, Security, and IT Services teams to ensure smooth and reliable releases.
- Created and maintained comprehensive documentation for build and release processes and application configurations.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

- Designed and developed e-commerce product features for a B2B project where customers can purchase fixtures, sinks, and related products. The project focused on the company, stakeholders, and applications to allow for online sales, distribution, and marketing of products.

Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

- Developed a B2B/B2C e-commerce payment portal system to support multiple merchants with various online and offline payment options. The project involved collaboration with Thai Trade to design and develop e-commerce features allowing for online sales, distribution, and marketing of electronics.

Skills

CI/CD Tools: Jenkins, Ansible

Build Tools: Ant, Maven

Version Control: GIT, Bitbucket

Programming & Scripting: Core Java, C, Shell Scripting

Application Servers: Apache Tomcat server

Operating Systems: Linux

Methodologies & Concepts: DevOps, SDLC, STLC, Continuous Integration, Continuous Deployment, Requirement Gathering, Configuration Management, Change Management, Documentation & Reporting
