

# Hossam Mohamed

Cloud Operations Architect (DevOps)

hossam.mohamed@email.com | +20 101 234 5678 |  github.com/hossam-mohamed |  linkedin.com/in/hossam-mohamed

## Education

### Symbiosis Institute

Post Graduate Diploma, Information Technology

Pune, India

January 2013

### Pune University

Bachelor of Engineering, Electronics and Telecommunications

Pune, India

January 2007

## Experience

### DevOps Engineer

Egy-Cloud Solutions

Cairo, Egypt

June 2017 - Present

- Manage Tibco Spotfire enterprise & Cloud Product support, serving as the sole Operations team member in India before building a new team.
- Recruited, built, and led a new DevOps team of 15 members, integrating them into 4 concurrent projects.
- Oversee production deployments, hot-fixes, and pre-production environment support for QA teams.
- Conduct workshops on new AWS services for the entire team to foster continuous learning.
- Automated cloud operations by writing Shell scripts to manage running instances and release unused Elastic IPs.
- Utilized AWS Lambda functions to trigger critical automation scripts for improved efficiency.
- Tech stack includes AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk) and Appdynamics.

### System Administrator

Synechron Technologies Limited

Pune, India

May 2015 - May 2017

- Managed Linux media server farms and provided comprehensive application support in a Unix environment.
- Performed system patching on physical and Linux-Xen virtualized servers to maintain security and stability.
- Created and managed software channels on Red Hat Satellite server for streamlined package deployment.
- Developed automation scripts using Shell scripting and provided support for MySQL databases.
- Troubleshoot and resolved issues with customized applications, ensuring minimal downtime.

### System Administrator

Tsys Limited

Pune, India

April 2013 - April 2015

- Managed user access control for RHDS, CVS, and dot project servers, ensuring security and proper permissions.
- Administered user access to development and production VDI servers.
- Implemented and maintained MySQL database replication across Linux servers for high availability.
- Developed Shell scripts to automate repetitive administrative tasks and improve operational efficiency.
- Analyzed project requirements to effectively plan environment setup and access controls.

### Senior System Engineer

Patni Computer Systems Limited

Pune, India

January 2011 - March 2013

- Provided L1 support for the Genworth Financial client account, focusing on maintenance of imaging solution applications.
- Monitored and maintained P8 Filenet applications and administered a fleet of 10 Linux proxy servers.
- Handled administration of MySQL servers, including implementing replication and performing backups via mysqldump.
- Managed and queried Oracle databases, testing and deploying SQL (insert, select, update) statements to production.
- Wrote and deployed Shell scripts for automation, such as a script to delete logs older than five days from production servers.

## **Skills**

---

**Cloud/DevOps:** AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch), Azure, Puppet, Automation, Solution Architecture

**Scripting & Programming:** Shell Scripting, Python, HTML

**Databases:** MySQL, Oracle, SQL

**Operating Systems:** Linux/Unix, IBM AIX, Windows

**Other Technologies:** P8 Filenet, Red Hat Satellite, Linux-Xen, Appdynamics, CVS
