Projects

FPGA Implementation of AES Algorithm

B.E. Project

Role: **Programmer**
I implemented the Advanced Encryption Standard (AES), a cryptographic algorithm, on an FPGA to protect data using a secret key.

Sorting Robot

T.E. Project

Role: **Mechanical Designer**
I designed the mechanism for a robot that sorts RGB colored balls based on color detection using a TCS 230 sensor.

RFID Based Student Attendance System Using GSM

Diploma Project

Role: **Developer**
I developed a system where students use an RFID card for attendance, which triggers a GSM module to send a notification message to their parents.
