Education

JNTU

CGPA: N/A

Masters of Science in Information Technology

June 2015 - June 2017, Hyderabad, Telangana, India

Experience

DevOps Engineer

On-Site

Nendrasys Technologies Pvt Ltd

June 2017 - August 2019, Cairo, Egypt

- Detailed technical knowledge and hands-on experience on DevOps, Automation, Build Engineering, and Configuration Management.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Developed Ant, Maven, and Shell scripts to automatically compile, package, deploy WAR, EAR, and JAR files of multiple applications to various platforms.
- Created Repositories, branches, managed user permissions, and maintained GIT, Bitbucket.
- Analyzed and resolved conflicts related to merging of source code for GIT.
- Implemented master-slave architecture setup to improve Jenkins performance.
- Handled end-to-end deployments and code propagation across different environments (DEV to PROD).
- Deployed and maintained code and applications, configuring components to increase re-usability.
- Worked closely with Architecture, Development, Test, Security, IT Services teams, and Business Analysts.
- Coordinated with developers, Business Analysts, and Managers for production deployments.
- Supported Business Analysts in using newly created jobs and release activities.
- Communicated daily with On-Site Team.
- Analyzed requirements and identified gaps, tracking logs and issues.
- Created and maintained documentation of build and release processes and application configuration.
- Planned and tracked activities involved for build and deployment, resolving build issues.
- Collaboration with Development, QA, Product management on build plans & schedules.
- Sent daily and weekly reports to the team.
- Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.
- Maintenance of Maven, shell scripts for safe builds and deploys.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

- Designed & developed e-commerce product features for the Sloan project, a B2B platform for fixers, sinks, and related products. Focused on online sales, distribution, and marketing.

Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

- Involved in the development of a B2B/B2C e-commerce payment portal system supporting multiple merchants and various online/offline payment options, in agreement with Thai Trade.
- Focused on designing and developing e-commerce product features for the BBLWTP project, including online sales, distribution, and marketing of electronics.

Skills

DevOps Tools: Ant - Maven - Git - Bitbucket - Jenkins - Ansible

Programming Languages: C - Core Java

Scripting: Shell Script

Operating Systems: Linux

Application Servers: Apache Tomcat server

Concepts & Methodologies: DevOps methodologies - CI/CD - SDLC - STLC - Requirement Gathering -

Documentation & Reporting - Test Reports - Change Management - Configuration Management - Deployment
