Education

Symbiosis Institute

Post Graduate Diploma in Information Technology

January 2013, Pune, Maharashtra, India

Pune University

Bachelor of Engineering in Electronics and Telecommunications

January 2007, Pune, Maharashtra, India

Experience

Cloud Operations Architect (DevOps)

Egy-Cloud Solutions

January 2014 - Present, Cairo, Egypt

- Functioned as a DevOps Engineer, specializing in AWS Cloud and Azure Cloud platforms.
- Utilized a range of AWS services including EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, CloudWatch, Auto-scaling, and Elastic Beanstalk, alongside AppDynamics for monitoring.
- Managed Tibco Spotfire enterprise and Cloud Product support, serving as the sole Operations member in India initially.
- Successfully recruited and built an entire team of 15 members, effectively integrating them into ongoing projects.
- Simultaneously managed and contributed to 4 different projects/products.
- Provided support to the India QA team by managing pre-production environments for testing.
- Coordinated critical production deployments and hot-fixes.
- Led the team and oversaw the execution of 4 projects, ensuring timely delivery and operational excellence.
- Organized and conducted workshops on new AWS services for the entire team to enhance skill sets.
- Developed shell scripts to automate the extraction and shutdown of AWS running instances.
- Authored shell scripts to identify and release unutilized Elastic IP (EIP) addresses.
- Implemented Lambda functions to trigger important automation scripts for enhanced operational efficiency.

Administration, Automation & Monitoring Engineer

Synechron Technologies Limited

January 2011 - December 2013, Pune, India

- Managed Linux media server farms and provided comprehensive application support.
- Performed patching operations for Linux physical and Xen virtual machines.
- Created and managed Satellite channels on Red Hat Satellite server for software distribution and patch management.
- Implemented automation solutions using shell scripting and provided MySQL database support.
- Troubleshoot and resolved issues related to customized applications, ensuring system stability.

Development, Automation & Monitoring Engineer

Tsys Limited

April 2009 - December 2010, Pune, India

- Provided access management for users on RHDS, CVS, and dot project servers.
- Managed user access on development and production VDI servers.
- Handled MySQL database administration and utilized shell scripting for task automation.
- Conducted requirements analysis to understand project needs and planned environment setups and access controls.
- Implemented MySQL replication across Linux servers to ensure data redundancy and availability.
- Fine-tuned existing applications for optimized performance.
- Performed thorough testing and debugging of scripts to eliminate errors and ensure reliability.

Senior System Engineer

Patni Computer Systems Limited (Client: Genworth Financial)

February 2007 - March 2009, Pune, India

- Project: CPI (Maintenance Project for Genworth Imaging Solutions).
- Provided administration support, including assisting L1 engineers, monitoring P8 FileNet application, and handling user tickets.

- Administered 10 Linux Proxy servers and MySQL servers, including implementing MySQL replication.
- Monitored logs of user visits and data downloads for compliance and security.
- Prepared SQL queries for client users and managed Oracle database operations.
- Tested insert, select, update queries on servers and oversaw their deployment to production environments.
- Resolved bugs reported by users and managed MySQL database backups using 'mysqldump'.
- Ensured the smooth operation of customer applications like eProcess and Trexo, and customized Filenet instances.
- Developed shell scripts to automate various application tasks, including a script to delete logs older than five days, successfully deployed to production.

Projects

CPI Project

February 2007 - March 2009

Pattern Maintenance System (PMS) for use by Client Genworth Financial within Genworth Imaging Solutions.

- Involved processing scanned insurance documents from various providers, storing information in Oracle Database and images in P8 Filenet.
- Developed and maintained multiple applications for generating reports sent to providers.
- Contributed to development, automation, and monitoring efforts across P8 Filenet, Linux/Unix, and IBM AIX platforms.

Skills

Cloud Platforms & Services: AWS - Azure - AWS EC2 - RDS - CloudFormation Template - Lambda - Dynamo DB - CloudWatch - Auto-scaling - Elastic Beanstalk - AppDynamics - Tibco Spotfire

Scripting & Automation: Shell Scripting - Python - Automation

Databases: MySQL - Oracle - SQL

Operating Systems: Linux/Unix - Windows - IBM AIX - Linux-Xen

Tools & Technologies: Puppet - Red Hat Satellite Server - P8 Filenet - RHDS - CVS - HTML - VDI Servers

Architecture: Solution Architect
