Education

JNTU

Masters of Science Information Technology

June 2015 – June 2017, Hyderabad, India

Experience

Devops Engineer

Full-time

Nendrasys Technologies Pvt Ltd

June 2017 – September 2019, Hyderabad, India

- Gained **27 months of experience** in Deployment and Git, **26 months** in Documentation, and **10 months** in Change and Configuration Management.
- Demonstrated detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Developed and maintained fully automated CI build and deployment infrastructures and processes for multiple projects using Jenkins.
- Created and managed repositories, branches, user permissions, and version control systems using GIT and Bitbucket.
- Developed Ant, Maven, and Shell scripts to automate compilation, packaging, and deployment of WAR, EAR, and JAR files to various platforms.
- Collaborated closely with Architecture, Development, Test, Security & IT Services teams to ensure seamless integration and delivery.
- Analyzed requirements, identified gaps, and tracked logs and issues to ensure project success and maintain high-quality standards.
- Coordinated end-to-end deployments and code propagations across various environments, from DEV to Production.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

Within Nendrasys Experience

- Nendrasys Technologies Pvt Ltd
- Designed and developed e-commerce product features for a B2B project, focusing on online sales, distribution, and marketing of fixers, sinks, and related products.
 - Implemented CI/CD pipelines and automated deployment processes to streamline product feature releases.
 - Managed GIT and Bitbucket repositories, ensuring proper version control and collaboration among development teams.

Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment Portal)

Within Nendrasys Experience

- Nendrasys Technologies Pvt Ltd
- Nendrasys Tech Devops Engineer
- Participated in weekly release meetings, proactively identifying and mitigating potential risks associated with software releases.
 - Created and maintained GIT repositories, branches, and user permissions, while resolving source code merging conflicts efficiently.
 - Implemented a Master-slave architecture for Jenkins, significantly improving the performance of the CI/CD infrastructure.
 - Handled comprehensive end-to-end deployments and code propagations across all environments, from development to production.
 - Developed and maintained Ant and Maven scripts for robust build automation, ensuring reliable software builds.

Skills

DevOps & CI/CD: Ant – Maven – GIT – Bitbucket – Jenkins – Ansible – Shell Scripting – Continuous Integration and Continuous Deployment – Dev-ops methodologies

Programming Languages: C – Core Java

Operating Systems: Linux

Application Servers: Apache Tomcat Server

SDLC & Methodologies: Requirement Gathering – Software Development Life Cycle – Software Testing Life Cycle – Documentation & Reporting – Test Reports – Change Management – Configuration Management – Deployment
