Education

Symbiosis Institute

Post Graduate Diploma in Information Technology

January 2013

Pune, Maharashtra, India

Pune University

Bachelor of Engineering in Electronics and Telecommunications

January 2007

Pune, Maharashtra, India

Experience

Cloud Operations Architect (DevOps)

Jan 2019 - Present

DevOps

Cairo, Egypt

- Managed Tibco Spotfire enterprise & Cloud Product support, overseeing platforms including AWS Cloud and Azure Cloud.
- Utilized AWS services such as EC2, RDS, CloudFormation Template, Lambda, DynamoDB, CloudWatch, Auto-scaling, and Elastic Beanstalk.
- Recruited and built a team of 15 DevOps members from scratch, significantly expanding the operations capability in India.
- Simultaneously managed and contributed to 4 different projects/products, integrating new team members effectively.
- Coordinated production deployments and hot-fixes, ensuring seamless operations.
- Arranged and led workshops on new AWS services for the entire team, fostering continuous learning and skill development.

Administration, Automation & Monitoring

Jan 2015 - Dec 2018

Synechron Technologies Limited

Alexandria, Egypt

- Managed Linux media server farms and provided comprehensive application support.
- Performed patching of Linux physical and Xen boxes to maintain system integrity and security.
- Created Satellite channels on Redhat Satellite server for efficient software and patch management.
- Developed and implemented automation solutions using shell scripting and provided MySQL database support.
- Troubleshoot and resolved issues in customized applications, ensuring high availability and performance.

Development, Automation & Monitoring

Jan 2013 - Dec 2014

Tsys Limited

Giza, Egypt

- Managed user access control for RHDS, CVS, and dot project servers, as well as dev/prod VDI servers.
- Handled MySQL database administration and developed shell scripts to automate various tasks.
- Conducted requirements analysis for projects, planning necessary environments and access configurations.
- Implemented and maintained MySQL replication across Linux servers.
- Fine-tuned existing applications to optimize performance and efficiency.
- Thoroughly tested and debugged scripts to ensure error-free operation.

Senior System Engineer (Project: CPI)

Nov 2010 - Dec 2012

Patni Computer Systems Limited (Client: Genworth Financial)

Cairo, Egypt

- Provided L1 engineering support and monitored P8 Filenet application for Genworth Imaging Solutions.
- Managed and resolved user tickets, ensuring timely support and issue resolution.
- Administered 10 Linux Proxy servers and MySQL servers, ensuring their optimal performance and security.
- Implemented MySQL replication for database redundancy and high availability.
- Checked logs of user visited sites and downloaded data for monitoring and compliance.
- Prepared SQL queries for client users and handled Oracle database operations including testing insert, select, update queries for production deployment.
- Managed bug resolution for database-related issues.
- Ensured proper functioning of customer applications such as eProcess and Trexo, and customized Filenet instances.
- Developed scripts to automate various application functions, improving operational efficiency.

Projects

AWS Resource Automation Scripts

2019 - 2022

- Developed shell scripts to automatically extract and shut down inactive AWS running instances, optimizing cloud resource usage.
- Created shell scripts to identify and release unattached Elastic IPs (EIPs), reducing unnecessary cloud costs.
- Implemented Lambda functions to trigger critical automation scripts based on predefined events, enhancing operational efficiency.

Production Log Management Automation

2010 - 2012

- Authored and deployed a shell script to production servers for automated deletion of logs older than five days, ensuring efficient disk space management.

Skills

Cloud & DevOps: AWS, Azure, Cloud Computing, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk, AppDynamics, Solution Architecture

Scripting & Automation: Shell Scripting, Python, Automation, Puppet, Redhat Satellite

Databases: MySQL, Oracle, SQL

Operating Systems: Linux/Unix, Windows, IBM AIX, Linux-Xen

Tools & Technologies: Tibco Spotfire, P8 Filenet, HTML, RHDS, CVS, VDI
