Education

JNTU

Masters of Science Information Technology

June 2015 - June 2017, Hyderabad, India

Experience

DevOps Engineer

Full-time - On-site

Nendrasys Technologies Pvt Ltd

Jan 2022 - Feb 2024

- Demonstrated detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Developed Ant, Maven, and Shell scripts to automatically compile, package, and deploy WAR, EAR, and JAR files to various platforms.
- Created repositories, branches, managed user permissions, and maintained GIT and Bitbucket.
- Deployed and maintained code and applications, configuring components to increase re-usability.
- Analyzed and resolved conflicts related to merging of source code for GIT.
- Implemented Master-slave architecture setup to improve Jenkins performance.
- Handled end-to-end deployments and code propagations across different environments, from DEV to PROD.
- Coordinated with Architecture, Development, Test, Security, IT Services, Business Analysts, QA, Performance, UAT testers, and Managers.
- Created and maintained documentation of build and release processes and application configuration.
- Sent daily and weekly reports to the team.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

Jan 2022 - Aug 2023

- Nendrasys Technologies Pvt Ltd
- Designed & developed E-commerce product features for a B2B project, enabling customers to buy fixers and sinks online.
 - Focused on online sales, distribution, and marketing aspects of the product for company stakeholders.
 - Planned and tracked activities involved in build and deployment processes.
 - Resolved critical build issues to maintain continuous integration.
 - Developed Jenkins scripts for automated build, deployment, and maintenance tasks.
 - Collaborated with Development, QA, and Product Management teams on build plans and schedules.
 - Managed repository creation, branching, merging, backup, and restore activities in Subversion servers.
 - Maintained Maven and Shell scripts to ensure safe and reliable builds and deployments.

Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

May 2023 - Feb 2024

- Nendrasys Technologies Pvt Ltd
- Served as a DevOps Engineer for a team managing multiple development teams and simultaneous software releases.
 - Participated in weekly release meetings to identify and mitigate potential risks associated with releases.
 - Responsible for creating repositories, branches, managing user permissions, and maintaining GIT.
 - Created fully automated CI build and deployment infrastructure and processes for various projects.
 - Analyzed and resolved conflicts related to merging of source code for GIT.
 - Responsible for creating Ant and Maven scripts for build automation.
 - Implemented Master-slave architecture setup to improve the performance of Jenkins.
 - Handled end-to-end deployments and code propagations across different environments, from DEV to PROD.
 - Developed and maintained Change Tasks, ensuring smooth transitions.
 - Closely collaborated with Developers, QA, Performance, UAT testers, and the IT Team.
 - Created and maintained comprehensive documentation of build and release processes and application configuration.
 - Coordinated with developers, Business Analysts, and Managers to ensure timely and successful code deployment to Production.

Skills

DevOps & CI/CD: Ant - Maven - GIT - Bitbucket - Jenkins - Ansible - CI/CD - Deployment - Configuration Management - Change Management

Programming & Scripting: C - Core Java - Shell Script

Operating Systems & Servers: Linux - Apache Tomcat server

Methodologies & Practices: DevOps Methodologies - SDLC - STLC - Requirement Gathering - Documentation & Reporting - Test Reports
