Education

Symbiosis Institute

Post Graduate Diploma Information Technology

Jan 2013, Pune, India

Pune University

Bachelor of Engineering Electronics and Telecommunications

Jan 2007, Pune, India

Experience

Cloud Operations Architect (DevOps)

Egy-Tech Solutions

DevOps Engineer - On-Site

Jan 2020 - Present, Cairo, Egypt

- Recruited and built an entire team of 15 members as the sole Ops member in India.
- Managed Tibco Spotfire enterprise & Cloud product support, overseeing operations across AWS Cloud and Azure Cloud.
- Utilized services including AWS EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk, and AppDynamics.
- Assisted India QA team with pre-production environments for testing purposes.
- Coordinated production deployments & hot-fixes, ensuring seamless integration and minimal downtime.
- Led the team and simultaneously handled 4 projects/products, demonstrating strong multitasking and leadership capabilities.
- Arranged workshops on new AWS services for the entire team, fostering continuous learning and skill development.

Administration, Automation & Monitoring

Synechron Technologies Limited

Jan 2017 - Dec 2019, Pune, India

- Managed Linux media server farms and provided comprehensive application support.
- Patched Linux physical and Xen boxes to ensure system security and performance.
- Created Satellite channels on Satellite server for efficient software distribution and management.
- Automated tasks via shell scripting and provided MySQL database support.
- Troubleshoot customized applications, resolving issues to maintain operational efficiency.

Development, Automation & Monitoring

Tsys Limited

Jan 2015 - Dec 2016, Pune, India

- Provided access to users on RHDS, CVS, and dotProject servers, managing permissions and security.
- Granted access to users on dev/prod VDI servers.
- Handled MySQL database and utilized shell scripting to automate tasks.
- Implemented MySQL replication over Linux servers to ensure data redundancy and availability.
- Fine-tuned existing applications for improved performance and responsiveness.
- Tested & debugged scripts for any errors, ensuring robust and reliable automation.

Senior System Engineer

Patni Computer Systems Limited (Client: Genworth Financial)

Oct 2012 - Dec 2014, Pune, India

- **Project: CPI** - A maintenance project for Genworth Imaging Solutions, catering to maintenance and enhancements of various applications.
- **Administration Support:** Provided support to L1 engineers; monitored P8 FileNet application; handled tickets raised by users; administered 10 Linux Proxy servers and MySQL servers; implemented MySQL replication; checked logs of sites visited by users and data downloaded.
- **MySQL / Oracle / SQL Support:** Prepared SQL queries for client users; handled Oracle database; tested insert, select, update queries over servers and deployed to production; handled bugs raised by users; implemented MySQL replication over Linux servers; performed database backup through MySQL dump.

- **Application Support:** Ensured customer applications like eProcess and Trexo were functioning correctly; ensured all customized P8 Filenet instances were working fine; wrote scripts to automate several applications.
- **Shell scripts for Automation:** Wrote shell script to delete logs older than five days, successfully deployed over Production servers.
- Platform: P8 Filenet, Linux/Unix, IBM AIX. Software: HTML, Shell scripting.

Projects

AWS Instance Management Automation

- Developed shell scripts to extract and efficiently shut down running AWS instances.
- Created shell scripts to identify and release unused Elastic IP (EIP) addresses, optimizing cloud resource utilization.
- Implemented Lambda functions to automatically trigger important scripts, enhancing automation workflows.

CPI Maintenance Project (Genworth Financial)

- Contributed to a critical maintenance and enhancement project for Genworth Imaging Solutions, focusing on various applications.
- Involved in processing scanned insurance documents, storing information in Oracle Database and images in P8 Filenet.
- Developed and maintained multiple applications for generating reports to be sent to providers.
- Authored and deployed a shell script to automate the deletion of logs older than five days, significantly improving server hygiene and storage management.

Skills

Cloud DevOps: Cloud Computing, Azure, AWS, AWS EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk, AppDynamics, Puppet, Redhat Satellite, Automation, Solution Architecture

Scripting Programming: Shell Scripting, Python, MySQL scripting

Databases: MySQL, Oracle Database, SQL

Operating Systems: Linux/Unix, IBM AIX, Windows, Linux-Xen Servers

Tools Technologies: P8 Filenet, RHDS, CVS, dotProject servers, VDI servers, HTML
