## Education

---

### Jawaharlal Nehru Technological University (JNTU)

Masters of Science in Information Technology

June 2015 - June 2017, Hyderabad, Telangana, India

## Experience

---

### DevOps Engineer

Full-time

Nendrasys Technologies

July 2017 - September 2019, Hyderabad, Telangana, India

- Applied detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Created and maintained fully automated CI build and deployment infrastructure and processes for multiple projects using Jenkins.
- Developed Ant, Maven, and Shell scripts for build automation, deployment, and maintenance of WAR, EAR, and JAR files across various platforms.
- Managed GIT and Bitbucket, including creating repositories, branches, user permissions, and resolving merge conflicts.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Handled end-to-end deployments and code propagations across various environments (DEV to PROD).
- Collaborated closely with Architecture, Development, Test, Security, IT Services, QA, Performance, UAT testers, and Business Analysts teams.
- Created and maintained comprehensive documentation for build and release processes and application configurations.
- Participated in weekly release meetings to identify and mitigate potential risks associated with software releases.
- Supported Business Analysts with newly created jobs and release activities; analyzed requirements, identified gaps, and tracked logs and issues.
- **Key Projects:**
  - **Sloan Global Holdings (Sloan) (E-commerce):** Designed and developed e-commerce product features for a B2B project focused on online sales, distribution, and marketing of fixers and sinks. Planned and tracked build/deployment activities, resolved build issues, managed repositories and merging, and provided daily/weekly reports to the team.
  - **Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal):** Served as a DevOps Engineer for a team handling multiple simultaneous software releases for an e-commerce payment portal. Implemented a Master-slave architecture setup to improve Jenkins performance, managed Change Tasks, and coordinated with various teams to ensure successful code deployment in the Production environment.

## Skills

---

**DevOps Methodologies:** Continuous Integration and Continuous Deployment - Software Development Life Cycle - Software Testing Life Cycle - Requirement Gathering - Change Management - Deployment

**Tools & Platforms:** GIT - Bitbucket - Jenkins - Ansible - ANT - Maven - Linux - Apache Tomcat Server

**Scripting:** Shell Script

**Programming Languages:** C - Core Java

**Other:** Documentation & Reporting - Test Reports
