Summary

Highly skilled and experienced DevOps Engineer with 2+ years of expertise in building, automating, and managing CI/CD pipelines. Proficient in a wide range of DevOps tools including Jenkins, Ansible, GIT, and Maven, with a strong background in Core Java and Shell Scripting. Proven ability to create robust, scalable, and automated solutions for software deployment and configuration management, ensuring seamless operations across development, QA, and production environments.

Education

JNTU

Masters of Science in Information Technology

June 2015 - June 2017, Hyderabad, Telangana, India

Experience

DevOps Engineer

Full-time

Nendrasys Technologies Pvt Ltd

June 2017 - August 2019, Cairo, Egypt

- Led the design and development of fully automated CI/CD build and deployment infrastructures for multiple projects, improving release efficiency.
- Developed and maintained Ant, Maven, and Shell scripts for automated compilation, packaging, and deployment of WAR, EAR, and JAR files across various platforms.
- Managed and configured version control systems (GIT, Bitbucket), including creating repositories, branches, and user permissions.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools, primarily Jenkins and Ansible.
- Analyzed project requirements, identified gaps, and tracked logs/issues, communicating daily with on-site teams.
- Collaborated closely with Architecture, Development, Test, Security, and IT Services teams to ensure seamless integration and deployment processes.
- Handled end-to-end deployments and code propagations across various environments (DEV to PROD), resolving merge conflicts in GIT.
- Implemented a Master-Slave architecture for Jenkins to enhance performance and scalability of build processes.
- Created and maintained comprehensive documentation for build/release processes and application configurations.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

June 2017 - June 2018

Nendrasys Technologies Pvt Ltd • Designed and developed e-commerce product features for a B2B project focused on fixers and sinks.

- Enabled online sales, distribution, and marketing functionalities for the company and its stakeholders.
- Applied DevOps, automation, build engineering, and configuration management expertise to project delivery.
- Developed Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files.
- Managed GIT and Bitbucket repositories, branches, and user permissions.
- Supported Business Analysts in using newly created jobs and release activities.

Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

July 2018 - August 2019

Nendrasys Technologies Pvt Ltd • Developed and implemented payment portal for B2B/B2C merchants with online and offline payment options, in partnership with Thai Trade.

- Focused on designing and developing e-commerce features for the BBLWTP project, including online sales and distribution of electronics.
- Served as DevOps Engineer, overseeing multiple development teams and simultaneous software releases.
- Participated in weekly release meetings to identify and mitigate potential risks.
- Implemented Master-Slave architecture for Jenkins, improving performance.
- Coordinated with Developers, QA, Performance, UAT testers, and IT Teams for successful code deployments.

Skills

DevOps Tools: Jenkins - Ansible

Version Control: GIT - Bitbucket

Build Tools: ANT - Maven

Scripting: Shell Script

Programming Languages: C - Core Java

Application Servers: Apache Tomcat server

Concepts & Methodologies: Dev-ops methodologies - CI/CD - SDLC - STLC - Requirement Gathering -

Documentation & Reporting - Test Reports - Change Management - Configuration Management - Deployment

Operating Systems: Linux
