Summary

Highly experienced Cloud Operations Architect with over 10 years of experience in DevOps, specializing in AWS and Azure cloud platforms. Proven expertise in shell scripting, Python automation, and solution architecture. Adept at managing enterprise cloud environments, leading technical teams, and optimizing operations for critical applications, with experience in onsite visits to Sweden and the US (Seattle) and holding a B1-VISA.

Education

Post Graduate Diploma in Information Technology

Symbiosis Institute, Pune, India

January 2013

Bachelor of Engineering in Electronics and Telecommunications

Pune University, Pune, India

January 2007

Experience

Cloud Operations Architect (DevOps)

Full-time - On-site

Egy-Cloud Innovations, Cairo, Egypt

Jan 2019 - Present

- Managed Tibco Spotfire enterprise & Cloud product support, overseeing operations across AWS Cloud and Azure Cloud platforms.
- Led the recruitment and built an entire team of 15 DevOps engineers, effectively integrating them across 4 different projects/products.
- Coordinated production deployments and hot-fixes, ensuring seamless operation and high availability of critical applications.
- Arranged and conducted workshops on new AWS services to upskill the team, fostering continuous learning and adoption of cloud best practices.
- Developed shell scripts to automate critical AWS operational tasks, including instance shutdown and free EIP release, enhancing efficiency.
- Implemented Lambda functions to trigger important automation scripts, improving responsiveness and reducing manual intervention.
- Collaborated with the India QA team, providing crucial pre-production environment support for comprehensive testing.

Systems Administrator & Automation Engineer

Full-time - On-site

Synechron Technologies Limited, Cairo, Egypt

Feb 2016 - Dec 2018

- Managed and provided application support for Linux media server farms, ensuring high performance and availability.
- Performed patching of Linux physical and Xen virtual machines, maintaining system security and stability.
- Created and managed Satellite channels on Redhat Satellite Server for efficient system provisioning and management.
- Automated routine administrative tasks using shell scripting and provided support for MySQL databases.
- Troubleshoot customized applications, resolving complex issues to minimize downtime and optimize performance.

Automation & Database Support Engineer

Full-time - On-site

Tsys Limited, Cairo, Egypt

Jan 2013 - Jan 2016

- Provided user access management for RHDS, CVS, and dot project servers, ensuring secure and controlled access.
- Managed user access to development/production VDI servers, facilitating secure and efficient remote work environments.
- Automated various operational tasks using shell scripting and provided comprehensive support for MySQL databases.

- Implemented and maintained MySQL replication across Linux servers, ensuring data redundancy and high availability.
- Fine-tuned existing applications and rigorously tested/debugged scripts to ensure error-free operation.
- Analyzed project requirements to plan and configure server environments and user access effectively.

Senior System Engineer

Full-time - On-site

Patni Computer Systems Limited, Cairo, Egypt

Jan 2010 - Dec 2012

- Provided L1 engineering support, monitored P8 Filenet application, and resolved user-raised tickets efficiently.
- Administered 10 Linux Proxy servers and MySQL servers, ensuring optimal performance and security.
- Implemented MySQL replication over Linux servers for enhanced data integrity and backup capabilities.
- Prepared complex SQL queries for client users and managed Oracle databases, including testing and deploying updates to production.
- Ensured smooth operation of customer applications like eProcess and Trexo, and customized Filenet instances.
- Developed shell scripts to automate log deletion (older than five days), successfully deploying them to production servers.
- Conducted log analysis for user site visits and data downloads, supporting security and compliance efforts.

Projects

CPI (Genworth Financial)

Jan 2010 - Dec 2012

Patni Computer Systems Limited implemented project for Genworth Imaging Solutions, processing scanned insurance documents.

- Responsible for storing information in Oracle Database and images in P8 Filenet, and generating provider reports.

Skills

Cloud Platforms: AWS (EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk), Azure

DevOps & Automation: Shell Scripting, Python, Automation, Puppet, Redhat Satellite Server

Databases: MySQL, Oracle, SQL

Operating Systems: Linux/Unix, IBM AIX, Windows

Monitoring & Tools: AppDynamics, P8 Filenet, RHDS, CVS

Other: HTML, Solution Architecture
