Education

JNTU

Masters of Science in Information Technology

June 2015 - June 2017, Hyderabad, Telangana

Experience

Devops Engineer

Full-time - On-Site

Nendrasys Technologies Pvt Ltd

July 2017 - September 2019, Hyderabad, India

- Demonstrated expertise in DevOps, Automation, Build Engineering, and Configuration Management.
- Designed and implemented fully automated CI build and deployment infrastructures across multiple projects.
- Authored and maintained scripts (Ant, Maven, Shell) for automated compilation, packaging, and deployment of applications (WAR, EAR, JAR) to various platforms.
- Managed version control systems (GIT, Bitbucket), including repository creation, branching strategies, and user permission management.
- Coordinated with cross-functional teams (Architecture, Development, Test, Security, IT Services, QA, Business Analysts, Managers) to ensure seamless software delivery.
- Oversaw end-to-end deployments and code propagation across development, QA, and production environments.
- Actively analyzed requirements, identified potential gaps, and meticulously tracked logs and issues to ensure project success.

Projects

Sloan Global Holdings (Sloan) (E-commerce)

- Project Scope: Designed & developed e-commerce product features for a B2B project, enabling online sales, distribution, and marketing of plumbing fixtures.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Collaborated with Development, QA, and Product Management on build plans & schedules.
- Managed repositories, branches, merging activities, backup, and restore activities in version control servers.
- Maintained Maven and Shell scripts for safe builds and deploys.

Bangkok Bank Limited (BBL) ThaiTrade (Commercial, E-commerce & Payment portal)

- Project Scope: Developed a comprehensive e-commerce payment portal for B2B/B2C merchants, integrating various online/offline payment options and partnering with Thai Trade.
- Acted as a Devops Engineer for a team involving different development teams and multiple simultaneous software releases.
- Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
- Responsible for creating Repositories, branches, managing the permissions of users and maintaining GIT.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Analyzed and resolved conflicts related to merging of source code for GIT.
- Responsible for creating Ant and Maven scripts for build automation.
- Implemented the setup for Master-slave architecture to improve the Performance of Jenkins.
- Handled end-to-end deployments and code propagation across different environments, DEV to PROD.
- Handled the tasks of developing and maintaining the Change Tasks.
- Closely worked with Developers, QA, Performance, UAT testers, IT Team.
- Created and maintained documentation of build and release processes and application configuration.
- Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

Skills

DevOps Tools & CI/CD: Ant - Maven - GIT - Bitbucket - Jenkins - Ansible

Programming Languages: C - Core Java

Scripting: Shell Script

Methodologies & Practices: DevOps Methodologies - Requirement Gathering - Continuous Integration and Continuous Deployment (CI/CD) - Software Development Life Cycle (SDLC) - Software Testing Life Cycle (STLC) - Documentation & Reporting - Test Reports - Change Management - Configuration Management - Deployment

Operating Systems: Linux

Application Servers: Apache Tomcat server
