Education

Post Graduate Diploma Information Technology

Symbiosis Institute, Pune, Maharashtra, India

January 2013

Bachelor of Engineering Electronics and Telecommunications

Pune University, Pune, Maharashtra, India

January 2007

Experience

Cloud Operations Architect (DevOps) - DevOps Engineer

Full-time - On-site

Egy-Tech Cloud Solutions, Cairo, Egypt

March 2020 - Present

- Managed Tibco Spotfire enterprise & Cloud Product support, overseeing AWS Cloud and Azure Cloud platforms and services including EC2, RDS, CloudFormation, Lambda, DynamoDB, CloudWatch, Auto-scaling, Elastic Beanstalk, AppDynamics.
- Recruited and built a 15-member operations team, being the sole ops member initially in India.
- Managed 4 different projects/products concurrently, integrating new team members effectively.
- Provided pre-production environment support for the India QA team for testing purposes.
- Coordinated production deployments and hot-fixes to ensure system stability.
- Led the operations team and managed four distinct projects.
- Conducted workshops on new AWS services to upskill the entire team.
- Developed shell scripts to automate tasks such as extracting and shutting down AWS running instances, and identifying and releasing free Elastic IP addresses.
- Implemented Lambda functions to trigger critical automation scripts efficiently.

Administration, Automation & Monitoring

Full-time - On-site

Synechron Technologies Limited, Cairo, Egypt

April 2017 - March 2020

- Managed Linux media server farms and provided comprehensive application support.
- Performed patching for Linux physical and Xen boxes to maintain system security and performance.
- Created Satellite channels on Redhat Satellite server for software distribution and management.
- Implemented automation solutions using shell scripting and provided MySQL database support.
- Troubleshoot customized applications to resolve issues and ensure smooth operation.

Development, Automation & Monitoring

Full-time - On-site

Tsys Limited, Giza, Egypt

September 2014 - March 2017

- Managed user access for RHDS, CVS, and dot project servers, ensuring proper permissions.
- Provided access to users on dev/prod VDI servers.
- Maintained MySQL databases and developed shell scripts to automate various administrative tasks.
- Conducted requirements analysis and planned environment configurations and access controls for projects.
- Implemented MySQL replication over Linux servers for data redundancy and high availability.
- Fine-tuned existing applications to improve performance and efficiency.
- Thoroughly tested and debugged scripts to identify and rectify errors.

Senior System Engineer

Full-time - On-site

Patni Computer Systems Limited, Alexandria, Egypt

July 2012 - August 2014

- **Administration Support:** Supported L1 engineers, monitored P8 Filenet application, handled user tickets, administered 10 Linux Proxy servers and MySQL servers, implemented MySQL replication, and checked site logs.
- **MySQL / Oracle / SQL Support:** Prepared SQL queries for clients, managed Oracle database, tested and deployed SQL queries to production, handled user-raised bugs, implemented MySQL replication, and performed database backups via mysqldump.
- **Application Support:** Ensured functionality of customer applications (eProcess, Trexo) and customized Filenet instances. Developed scripts to automate application processes.
- **Shell scripts for Automation:** Authored and successfully deployed shell scripts to production servers for deleting logs older than five days.

Projects

CPI (Client: Genworth Financial)

July 2012 - August 2014

- Maintenance and enhancement project for Genworth Imaging Solutions, processing scanned insurance documents and generating reports.
- Utilized Oracle Database for information storage and P8 Filenet for image management.
- Involved significant administration, database, and application support, detailed under Patni Computer Systems Limited experience.

Skills

Cloud & DevOps: AWS Cloud - Azure Cloud - EC2 - RDS - CloudFormation - Lambda - DynamoDB - CloudWatch - Auto-scaling - Elastic Beanstalk - AppDynamics - Puppet - Redhat Satellite Server

Scripting Automation: Shell Scripting - Python - Automation

Databases: MySQL - Oracle - SQL

Operating Systems: Linux/Unix - IBM AIX - Windows - Linux-Xen Servers

Tools Technologies: P8 Filenet - HTML - RHDS - CVS - VDI Servers
