Education

JNTU

Masters of Science in Information Technology

June 2015 - June 2017, Hyderabad, India

Experience

DevOps Engineer

Full-time - On-site

Nendrasys Technologies Pvt Ltd

July 2017 - September 2019, Hyderabad, India

- Gained detailed technical knowledge and hands-on experience in DevOps, automation, build engineering, and configuration management.
- Created fully automated CI build and deployment infrastructure and processes for multiple software projects.
- Developed scripts for build, deployment, maintenance, and related tasks utilizing Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Authored Ant, Maven, and Shell scripts to automate compilation, packaging, and deployment of WAR, EAR, and JAR files across various platforms.
- Managed GIT and Bitbucket by creating repositories, branches, and administering user permissions.
- Handled end-to-end deployments and code propagations across different environments from development to production.
- Collaborated closely with Architecture, Development, Test, Security, and IT Services teams to ensure seamless integration and delivery.
- Supported Business Analysts in adopting newly created jobs and release activities.
- Communicated daily with On-Site Teams, providing updates and resolving issues.
- Analyzed project requirements, identified gaps, and diligently tracked logs and issues.
- Participated in weekly release meetings to proactively identify and mitigate potential risks associated with software releases.
- Analyzed and resolved conflicts related to merging source code within GIT repositories.
- Implemented Master-slave architecture for Jenkins to significantly improve CI/CD pipeline performance.
- Created and maintained comprehensive documentation for build and release processes, as well as application configurations.
- Coordinated with developers, business analysts, and managers to ensure successful deployment to production environments.

Projects

Sloan Global Holdings (Sloan) E-commerce

July 2017 - September 2019

- Designed and developed e-commerce product features for a B2B platform, focusing on fixers and sinks related products.
- Implemented features to support online sales, distribution, and marketing strategies for plumbing products.

Bangkok Bank Limited (BBL) ThaiTrade E-commerce & Payment Portal

July 2017 - September 2019

- Developed a B2B/B2C e-commerce payment portal system, enabling multiple merchants and diverse online/offline payment options in collaboration with Thai Trade.
- Focused on the design and development of e-commerce product features for the BBLWTP project, enhancing online sales and distribution of electronics.

Skills

DevOps & CI/CD: Ant - Maven - Git - Bitbucket - Jenkins - Ansible - Apache Tomcat Server - Continuous Integration/Deployment

Programming Languages: C - Core Java

Scripting: Shell Script

Operating Systems: Linux

Methodologies: DevOps Methodologies - Requirement Gathering - SDLC - STLC - Documentation & Reporting - Test Reports - Change Management - Configuration Management
