Education

JNTU

Masters of Science Information Technology

June 2015 - June 2017, Hyderabad, Telangana, India

Experience

DevOps Engineer

Full-time

Nendrasys Technologies Pvt Ltd

July 2017 - October 2019, Cairo, Egypt

- Gained detailed technical knowledge and hands-on experience in DevOps, Automation, Build Engineering, and Configuration Management.
- Developed and maintained CI/CD pipelines, automating build and deployment processes for multiple projects.
- Utilized various tools including Jenkins, Ant, Maven, Git, and Bitbucket for robust software delivery.
- Collaborated cross-functionally with Architecture, Development, Test, Security, and IT Services teams to ensure seamless deployments and releases.

Projects

Sloan Global Holdings (Sloan) - E-commerce Development

July 2017 - October 2019

Nendrasys Technologies Pvt Ltd | Product features for a B2B project, focusing on online sales, distribution, and marketing of fixer and sink products.

- Created fully automated CI build and deployment infrastructure and processes.
- Developed scripts for build, deployment, maintenance, and related tasks using Jenkins.
- Installed, configured, and maintained Continuous Integration, Automation, and Configuration Management tools.
- Developed Ant, Maven, and Shell scripts to automatically compile, package, and deploy WAR, EAR, and JAR files to various platforms.
- Created repositories, branches, managed user permissions, and maintained GIT and Bitbucket.
- Deployed and maintained code and applications, configuring components to increase re-usability.
- Supported Business Analysts in understanding new jobs and release activities, and communicated daily with the On-Site Team.
- Analyzed requirements, identified gaps, and tracked logs and issues.

Bangkok Bank Limited (BBL) ThaiTrade - Commercial, E-commerce & Payment Portal

July 2017 - October 2019

Nendrasys Technologies Pvt Ltd | Senior DevOps Engineer for a team managing multiple development teams and simultaneous software releases for an e-commerce payment portal.

- Participated in weekly release meetings, identifying and mitigating potential risks associated with releases.
- Managed creation of repositories, branches, user permissions, and maintenance of GIT.
- Created fully automated CI build and deployment infrastructure and processes for multiple projects.
- Analyzed and resolved conflicts related to merging source code for GIT.
- Created Ant and Maven scripts for build automation.
- Implemented Master-Slave architecture setup to improve Jenkins performance.
- Handled end-to-end deployments and code propagations across different environments (DEV to PROD).
- Developed and maintained Change Tasks, working closely with Developers, QA, Performance, UAT testers, and the IT Team.
- Created and maintained documentation of build and release processes and application configuration.
- Coordinated with developers, Business Analysts, and Managers to ensure production deployments.
- Planned and tracked activities involved in build and deployment, and resolved build issues.
- Collaborated with Development, QA, and Product Management on build plans & schedules.
- Sent daily and weekly reports to the team.
- Involved in creating repositories, branches, merging activities, backup, and restore activities in subversion servers.
- Maintained Maven and Shell scripts for safe builds and deploys.

Skills

DevOps & CI/CD: Ant, Maven, Git, Bitbucket, Jenkins, Ansible, Apache Tomcat, Continuous Integration, Continuous Deployment, Automation, Build Engineering, Configuration Management

Scripting & OS: Shell Script, Linux

Programming: C, Core Java

Methodologies & Practices: DevOps Methodologies, SDLC, STLC, Requirement Gathering, Change Management, Documentation & Reporting, Software Testing
