Education

JNTU

Masters of Science in Information Technology

June 2015 – June 2017, Hyderabad, India

Experience

DevOps Engineer

Full-time

Nendrasys Technologies Pvt Ltd

July 2017 – September 2019, Hyderabad, India

- Functioned as a DevOps Engineer, overseeing continuous integration and deployment workflows for multiple software releases.
- Implemented and maintained CI/CD pipelines, build automation, and configuration management across various projects.
- Collaborated with cross-functional teams (Architecture, Development, QA, Security, IT Services) to ensure seamless code propagation and release management from development to production.
- Authored comprehensive documentation for build / release processes and application configurations, ensuring knowledge transfer and operational efficiency.
- Managed version control systems (GIT, Bitbucket), including repository creation, branching strategies, and user permission administration.

Projects

Sloan Global Holdings (Sloan) E-commerce

Nendrasys Technologies Pvt Ltd - Designed and developed e-commerce product features for a B2B project focusing on online sales, distribution, and marketing of fixers and sinks related products.

- Developed scripts using Jenkins for build, deployment, and maintenance tasks.
- Created Ant, Maven, and Shell scripts for automated compilation, packaging, and deployment of WAR, EAR, and JAR files.
- Supported Business Analysts in adopting new jobs and release activities.
- Analyzed requirements, identified gaps, and meticulously tracked logs and issues for project deliverables.

Bangkok Bank Limited (BBL) Thaitrade E-commerce & Payment Portal

Nendrasys Technologies Pvt Ltd - Developed and implemented a B2B/B2C e-commerce payment portal system, supporting multiple merchants with various online and offline payment options, integrating with Thai Trade.

- Participated in weekly release meetings to identify and mitigate potential risks associated with software releases.
- Analyzed and resolved conflicts related to merging source code for GIT.
- Created Ant and Maven scripts for build automation.
- Implemented Master-Slave architecture for Jenkins to enhance performance.
- Handled end-to-end deployments and code propagation across different environments (DEV to PROD).
- Managed change requests and tasks, coordinating with various stakeholders for smooth production deployments.

Skills

DevOps Tools: Jenkins – Ansible – GIT – Bitbucket – Ant – Maven – Linux – Shell Scripting – Apache Tomcat Server

Methodologies: DevOps – CI/CD – SDLC – STLC – Requirement Gathering – Change Management – Documentation & Reporting – Test Reports

Programming: C – Core Java
